Question No : 2
Which menu on the Cisco TelePresence VCS should you refer to in order to verify that an endpoint has registered?
A. Application
B. Status
C. Security
D. Configuration
Answer: B
Explanation:
The Registrations by device page (Status > Registrations > By device) lists each device currently registered with the VCS, and allows you to remove a device's registration. If the VCS is part of a cluster, all registrations across the cluster are shown. Note that an H .323 device can register with more than one alias; in such cases this page will show only one alias and (when present) one E .164 number for that device. Note also that a single device can support both the SIP and H .323 protocols; in such a case the SIP registration and the H.323 registration will appear as separate entries on this page.
