Cisco Exam Questions 640-802
Cisco Certified Network Associate
1. When is the earliest point at which the reduce method of a given Reducer can be called?
A. As soon as at least one mapper has finished processing its input split.
B. As soon as a mapper has emitted at least one record.
C. Not until all mappers have finished processing all records.
D. It depends on the InputFormat used for the job.
Answer: C

Explanation: The application hasn’t replicated to Child2.

Rmctrl.log:Records the activities of database replication between sites in the hierarchy.

2. Which describes how a client reads a file from HDFS?

A. The client queries the NameNode for the block location(s). The NameNode returns the block location(s) to the client. The client reads the data directory off the DataNode(s).
B. The client queries all DataNodes in parallel. The DataNode that contains the requested data responds directly to the client. The client reads the data directly off the DataNode.
C. The client contacts the NameNode for the block location(s). The NameNode then queries the DataNodes for block locations. The DataNodes respond to the NameNode, and the NameNode redirects the client to the DataNode that holds the requested data block(s). The client then reads the data directly off the DataNode.
D. The client contacts the NameNode for the block location(s). The NameNode contacts the DataNode that holds the requested data block. Data is transferred from the DataNode to the NameNode, and then from the NameNode to the client.
E. The keys given to a reducer are in sorted order but the values associated with each key are in no predictable order
Answer: A,B,E

Explanation:

The client contacts the NameNode for the block location(s).

AD User discovery for Primary Site and Group discover for Each Primary Site:

DDRs are in turn processed by site servers and entered into the Configuration Manager database where they are then replicated by database-replication with all sites. The replication makes discovery data available at each site in the hierarchy, regardless of where it was discovered or processed.

3. John works as a Database Administrator for Bluewell Inc. The company has a SQL Server database. A table in the database has a candidate key and an attribute that is not a constituent of the candidate key. The non-key attribute depends upon the whole of the candidate key rather than just a part of it. Which of the following normal forms is represented in the scenario?

A. 4 NF.
B. 2 NF.
C. 1 NF.
D. 3 NF.
Answer: B

4. You are creating a JavaScript function that displays the name of a web application. You declare the following button element.

Guaranteed success with Our exam guides
Columns two and four are the same width, but much wider than columns one, three, and five. The grid resembles the following image:

When a user clicks the button, a JavaScript function named About must be called.

You need to create an event handler that calls the About function when the button is clicked.

Which two code segments can you use? (Each correct answer presents a complete solution. Choose two.)

A. Option A
B. Option B
C. Option C
D. Option D

Answer: C,D
Thank You for Trying Our Product

We offer two products:

1st - We have Practice Tests Software with Actual Exam Questions
2nd - Questions and Answers in PDF Format

640-802 Practice Exam Features:

* 640-802 Questions and Answers Updated Frequently
* 640-802 Practice Questions Verified by Expert Senior Certified Staff
* 640-802 Most Realistic Questions that Guarantee you a Pass on Your FirstTry
* 640-802 Practice Test Questions in Multiple Choice Formats and Updates for 1 Year

100% Actual & Verified — Instant Download, Please Click
