Cisco Exam Questions 642-691
CCIP BGP + MPLS Exam (BGP + MPLS)
1. For which purpose is the command `mpls ldp maxhops` used?
   A. In large ATM-MPLS networks, the LFIB can become too large and it may be necessary to limit the maximum diameter of the MPLS LSPs.
   B. Because downstream-on-demand label allocation uses hop count to control loop detection, it may be necessary to limit the maximum diameter of the MPLS network.
   C. Because end-to-end delay can cause problems with some voice applications, it may be necessary to limit the maximum diameter of the MPLS network.
   D. When interconnecting large frame mode MPLS and cell mode networks it may be necessary to limit the maximum network diameter to prevent forwarding loops.
   Answer: B

2. Refer to the diagram.
   What problem can be caused by the second P router summarizing the loopback address of the egress PE router?
   A. The first P router will be faced with a VPN label which it does not understand.
   B. The second P router will be faced with a VPN label which it does not understand.
   C. The egress PE router will not be able to establish a label switch path (LSP) to the ingress PE router.
   D. A label switch path (LSP) will be established from the ingress PE router to the egress PE router, an event that is not desirable.
   E. The ingress PE router will not be able to receive the VPN label from the egress PE router via MP-IBGP.
   Answer: B

3. In a central services topology, which routes do client VRFs contain?
   A. routes from the client site, but not from the server site
   B. routes from the server site, but not from the client site
   C. routes from both the client site and the server site
   D. only EBGP routes from either the client site or the server site
   Answer: C

4. On a dedicated subinterface implementation, PE-2 must establish an address-family vrf IPv4 BGP neighbor relationship with which router?
   A. CE-1
   B. CE-2
   C. PE-1
   D. PE-IG
   E. CE-1 and CE-2
   F. PE-1 and PE-IG
   Answer: B

5. What are three drawbacks of a peer-to-peer VPN using a shared provider edge (PE) router? (Choose three.)
   A. A full mesh of virtual circuits is required between the customer sites.
6. Which two of the following statements regarding LDP are true? (Choose two.)
   A. LDP can also be used between nonadjacent routers using multicast LDP hello messages.
   B. LDP does not require periodic hello messages once the LDP session has been established between
      the LDP peers.
   C. LDP hello messages use TCP packets with a destination port number of 646.
   D. Multiple sessions can be established between a pair of LSRs if they use multiple label spaces.
   E. Per-platform label space can be identified by a label space ID of 0 in the LDP identifier field.
   Answer: DE

7. Refer to the exhibit.
   Which two of the following statements about the MPLS configurations are true? (Choose two.)
   A. The VPI range being configured is the default VPI range.
   B. The router is missing the mpls label protocol ldp configuration command on its ATM 0/0.1 subinterface
      to make it an LC-ATM enabled subinterface.
   C. There is a problem with the configurations because the control VC should be set to 0 32 instead.
   D. The ATM switch is using VC merge since VC merge is enabled by default.
   E. For MPLS label allocations, both VPI 6 and 7 can be used.
   Answer: DE

8. What does the following command accomplish?
   sanjose#clear ip bgp 10.1.1.1 in prefix-list
   A. The sanjose router will perform an outbound soft reconfig to the 10.1.1.1 neighbor.
   B. The sanjose router will send out the ORF prefix-list so that a new route refresh will be received from the
      1.1.1 neighbor.
   C. The 10.1.1.1 router will perform an inbound soft reconfig on the updates from the sanjose neighbor.
   D. The 10.1.1.1 router will send out the ORF prefix-list so that a new route refresh will be received from
      the sanjose neighbor.
   E. The bgp session between the sanjose and the 10.1.1.1 router will be reset so that all the new bgp
      updates from the 10.1.1.1 router can be processed by the inbound prefix-list at the sanjose router.
   F. The bgp session between the sanjose and the 10.1.1.1 router will be reset so that all the new bgp
      updates from the sanjose router can be processed by the inbound prefix-list at the 10.1.1.1 router.
   Answer: B

9. Based on the topology diagram shown in the exhibit, when should BGP be used as the routing protocol
    between the customer and the ISP?
   A. If physical link failures can not be detected by the link-level procedures.
B. If the customer wants to affect how the ISP will route the customer's traffic out to the rest of the Internet.

C. If the ISP does not support static routing with the customer.

D. If the customer is using provider-assigned (PA) addresses inside the customer's network.

E. If the customer is using private addresses inside the customer's network.

Answer: A

10. Based on the network diagram shown in the exhibit, what is the correct configuration on the customer edge router used to conditionally announce the customer networks to the ISP?

A. router bgp 65001
   ! neighbor commands not shown
   network 192.168.8.0 mask 255.255.252.0
   !
   ip route 192.168.8.0 255.255.252.0 192.168.8.33

B. router bgp 65001
   ! neighbor commands not shown
   aggregate-address 192.168.8.0 255.255.252.0 summary-only
   !
   ip route 192.168.8.0 255.255.252.0 192.168.8.33

C. router bgp 65001
   ! neighbor commands not shown
   network 192.168.8.0
   network 192.168.9.0
   network 192.168.10.0
   network 192.168.11.0
   !
   ip route 192.168.8.0 255.255.255.0 null0
   ip route 192.168.9.0 255.255.255.0 null0
   ip route 192.168.10.0 255.255.255.0 null0
   ip route 192.168.11.0 255.255.255.0 null0

D. router bgp 65001
   ! neighbor commands not shown
   aggregate-address 192.168.8.0 255.255.252.0 summary-only
   !
   router ospf 1
   network 192.168.8.0 0.0.3.255 area 0

E. router bgp 65001
   ! neighbor commands not shown
   aggregate-address 192.168.8.0 255.255.252.0
   !
   ip route 192.168.8.0 255.255.252.0 null0

Answer: A
Thank You for Trying Our Product

We offer two products:

1st - We have Practice Tests Software with Actual Exam Questions
2nd - Questions and Answers in PDF Format

642-691 Practice Exam Features:

* 642-691 Questions and Answers Updated Frequently
* 642-691 Practice Questions Verified by Expert Senior Certified Staff
* 642-691 Most Realistic Questions that Guarantee you a Pass on Your FirstTry
* 642-691 Practice Test Questions in Multiple Choice Formats and Updates for 1 Year

100% Actual & Verified — Instant Download, Please Click
Order The 642-691 Practice Test Here
