Cisco

Exam Questions 642-993

Data Center Unified Computing Systems Design (DCUCD)
1. Which of the following would be considered a Cisco Unified Computing technical design criteria?
   A. Increase the number of servers in the data center.
   B. Decrease security requirements.
   C. Simplify the Data Center architecture.
   D. Reduce power costs while maintaining or increasing compute capacity.
   Answer: C

2. Which three business pressures are most typically faced by data centers? (Choose three.)
   A. language barriers
   B. government regulation and compliance
   C. SLA metrics
   D. global availability
   E. technology silos
   Answer: B, C, D

3. Which two physical security concerns would most likely be considered first when planning a data center installation? (Choose two.)
   A. ventilation
   B. alarm systems
   C. raised flooring
   D. fire suppression systems
   Answer: B, D

4. Which condition is prevented by the use of the "Combined" power redundancy mode in the Nexus 7000?
   A. one PSU failure
   B. lack of redundancy
   C. one input circuit failure
   D. one PSU or one input circuit failure
   Answer: B

5. Which statement is true regarding UCS ports dedicated as external LAN device uplinks?
   A. Ports carry VLAN traffic only
   B. Ports are configured as ISL trunks
   C. Spanning tree must be enabled on these ports
   D. Ports are configured as access ports
   Answer: A

6. Which three components are included in Cisco Business Advantage Data Center Architecture? (Choose three.)
   A. unified I/O
   B. virtualization
C. Security Manager
D. consolidation
E. Desktop Consolidator
Answer: A,B,D

7. What is the purpose of the L1 and L2 ports on the Cisco UCS 6100 and 6200 Series Fabric Interconnect switches when running in a cluster with another fabric interconnect?
A. support LACP
B. provide high-availability services
C. used for out-of-band management
D. centralized management port
Answer: B

8. Which is a characteristic of the end-host-mode?
A. It offers no redundancy.
B. It participates in STP.
C. It participates in network control data plan.
D. UCS appears to the external LAN as an end station with many adapters.
Answer: D

9. What is the primary purpose of NPIV?
A. It is a switch-based solution with a reduction in overhead.
B. Virtual server interfaces can be created within an Cisco MDS switch.
C. Virtual machines can bypass the hypervisor and access a LUN directly.
D. Multiple virtual applications can share a single switch port while maintaining their identity.
Answer: D

10. What is the purpose of a VSAN in a Cisco Data Center network?
A. to share the zoning across other configured VSANs
B. to provide distributed service within the SAN fabric
C. to advertise the existence of LUNs across the storage area management fabric
D. to facilitate logical end-to-end separation within a single physical storage infrastructure
Answer: D
Certshared now are offering 100% pass ensure 642-993 dumps!

Thank You for Trying Our Product

We offer two products:

1st - We have Practice Tests Software with Actual Exam Questions
2nd - Questions and Answers in PDF Format

642-993 Practice Exam Features:

* 642-993 Questions and Answers Updated Frequently
* 642-993 Practice Questions Verified by Expert Senior Certified Staff
* 642-993 Most Realistic Questions that Guarantee you a Pass on Your First Try
* 642-993 Practice Test Questions in Multiple Choice Formats and Updates for 1 Year

100% Actual & Verified — Instant Download, Please Click
