Cisco

Exam Questions 650-575
LCSAS Cisco Lifecycle Services Advanced Security
1. Which service component in the security implement phase includes activities such as executing test cases, capturing test result, and tuning test procedures?
   A. Staging
   B. Network Ready for Use
   C. Define Technical Procedures
   D. As-Built Documentation
   E. Acceptance Testing
   Answer: E

2. Which of the following is the best description of the develop project management plan activity within the project-planning service component?
   A. Obtains customer surveys, captures lessons learned, and update leading practices
   B. Integrates devices without disrupting the existing network or creating points of vulnerability
   C. Documents planning of assumptions and decisions; facilitates communication among stakeholders, and documents approved scope, cost and schedule baselines.
   D. Create final network documentation that reflects “as-built” information for customer, including specific design requirements and configurations
   Answer: C

3. Which three business requirement development activities are performed in the prepare phase before creating a technology strategy? (Choose three)
   A. Document and Categorize the Business Requirement of Customer in Terms of Performance, Availability, Capacity, and Security
   B. Create a Business Case
   C. Produce a Documented Technology Strategy
   D. Identify and Assess the Business Requirements of Customer
   E. Conduct a Systems Strategy Meeting.
   F. Create a Bill of Materials
   Answer: ADE

4. Which implement phase service component provides for creating the final network documentation that reflects information for the customer, including specific design requirements and configurations?
   A. Device Deployment
   B. Post-Implementation support handoff meeting
   C. As-Built Documentation
   D. Staff Training for IT Admin and Help Desk.
   Answer: C

5. Which three of the following service component are included in the design phase? (Choose Three)
   A. Account Qualification and Planning
   B. Staging Plan Development

C. Systems Acceptance Test Plan Development
D. Proposal Development
E. Staff Training
F. Detailed Design Customer Sign-off
Answer: BCF

6. Which service component is in the security operate phase?
A. Operations Design
B. Change Management
C. Operation Assessment
D. Security Technology Assessment
Answer: B

7. In which service component of the security operate phase are network issues analyzed to identify trends?
A. Security Administration
B. Incident Management
C. Operation Setup
D. System Monitoring
Answer: B

8. Which Cisco Lifecycle Services security phase defines operational excellence through ongoing improvement of system performance and functionality?
A. Optimize
B. Design
C. Operate
D. Implement
E. Prepare
Answer: A

9. Which service component is part of the security implement phase?
A. Select Fault Management Tools and Products
B. Change Management
C. Project Closeout
D. Operations Setup
Answer: C

10. What is the purpose of the technology strategy development service component in the prepare phase?
A. Create a network diagram that contains network topology and location of each management console
B. Create a breakdown of project tasks and responsibilities
C. Create a model network that will allow the customer to how the proposed security technology solution will work

D. Include a statement of work that defines the scope of work to be completed for the proposed security solution
E. Help identify and document the customer current network architecture and security policies and create a gap analysis.
Answer: C

11. Which Implement phase service component describes activities to install and test your security solution in a nonproduction environment?
A. Proof of Concept
B. Lab Testing
C. Staging
D. Acceptance Testing
Answer: C

12. Which activity is included in the security business requirements development service component in the prepare phase?
A. Hold Partner and Cisco Systems Strategy Meeting.
B. Conduct Initial Interview
C. Conduct Executive Sponsor Interview
D. Conduct Business Requirements Workshops.
Answer: D

13. Which two activities are included in security detailed design development service component in the design phase? (Choose two)
A. Develop the Detailed Design for Intrusion Prevention System
B. Conduct Site Readiness Assessment
C. Create a Detailed Staff Training Matrix
D. Conduct Site Readiness Assessment
E. Present Low-Level Design
F. Perform Detailed Analysis for Intrusion Prevention System
Answer: AF

14. Which of the following is the best description of Cisco Security Agent staging activity in the implement phase?
A. Completing the implementation of the Cisco Security Agent policies and groups requires the execution of tasks and deliverables that support these installations.
C. Ensure that the list of hardware is proper and complete.
D. Install and test the Cisco Security Agent component in a nonproduction lab environment.
Answer: D
15. Which of the following is the best definition of the Cisco Lifecycle Services approach?

A. Determines the correct pricing of Cisco products
B. Consists of the phase of plan, deploy, support, and troubleshoot
C. Defines the minimum set of services required to successfully deploy and operate Cisco technologies
D. Provides partners with a useful way to leverage Cisco resources

Answer: C

16. Which three activities are part of a security site readiness assessment service component in the plan phase? (Choose three)

A. Business Case development
B. Perform an Acceptance Test Plan
C. Facility Site Survey
D. Assess Infrastructure Requirements
E. Perform Site Assessment Gap Analysis
F. As-Built Documentation

Answer: CDE

17. Which service component is part of the design phase?

A. High-Level Design Development
B. Implementation Plan Development
C. Site Readiness Assessment
D. Change Management

Answer: B

18. Which service component helps manage real-time network issues?

A. Incident and problem management
B. Change Management
C. Acceptance Test Plan
D. Configuration Management

Answer: A

19. What is key objective of the security solutions readiness assessment?

A. Document the current and future technology projects of the customer
B. Assess and document infrastructure for the proposed solution
C. Document power and UPS availability.
D. Create a design specification document

Answer: B

20. Which two of these activities comprise the implementation plan development service component in the design phase? (Choose Two)

A. Discuss Project Roles and Responsibilities.
B. Develop the System Implementation Plan.

Answer: AB
C. Present System Implementation Plan

D. Confirm Project and Milestone Dates

Answer: BC
Thank You for Trying Our Product

We offer two products:

1st - We have Practice Tests Software with Actual Exam Questions
2nd - Questions and Answers in PDF Format

650-575 Practice Exam Features:

* 650-575 Questions and Answers Updated Frequently
* 650-575 Practice Questions Verified by Expert Senior Certified Staff
* 650-575 Most Realistic Questions that Guarantee you a Pass on Your First Try
* 650-575 Practice Test Questions in Multiple Choice Formats and Updates for 1 Year

100% Actual & Verified — Instant Download, Please Click
Order The 650-575 Practice Test Here
