Microsoft

Exam Questions 70-341
Core Solutions of Microsoft Exchange Server 2013

Certshared now are offering 100% pass ensure 70-341 dumps!
https://www.certshared.com/exam/70-341/ (242 Q&As)
NEW QUESTION 1
You need to recommend which type of group must be used to create the planned department lists.
Which type of group should you recommend?

A. Universal Distribution  
B. Dynamic Distribution  
C. Global Security  
D. Universal Security

Answer: A

NEW QUESTION 2
You are testing the planned implementation of Exchange Server 2013. After you begin moving several mailboxes to Exchange Server 2013, you discover that users on the internal network that have been moved are prompted repeatedly for their credentials when they run Microsoft Outlook. You run the Get-OutlookAnywhere cmdlet on CH-EX4, and receive the following output:

SSL offloading: True  
External Hostname: Client.litwareinc.com  
Internal Hostname: CH-EX4.litwareinc.com  
ExternalClientAuthenticationMethod: Basic  
InternalClientAuthenticationMethod: NTLM  
IISAuthenticationMethods: <Basic>

You need to prevent the internal users from being prompted for their credentials when they connect to their mailbox by using Outlook. Which property should you modify by using the Set-OutlookAnywhere cmdlet?

A. IISAuthenticationMethods  
B. InternalHostname  
C. ExternalHostname  
D. ExternalClientAuthenticationMethod  
E. InternalClientAuthenticationMethod

Answer: A

NEW QUESTION 3
You are evaluating the planned deployment of the additional Exchange Server 2013 servers. You need to recommend changes to the DNS records to ensure that email messages are routed to the Detroit site if the servers in the New York site are unavailable. What should you recommend adding?

A. An MX record that has a preference value of 10 that points to EX4  
B. An MX record that has a preference value of 20 that points to EX4  
C. An MX record that has a preference value of 10 that points to EX3  
D. An MX record that has a preference value of 20 that points to EX3

Answer: B

Explanation: Topic 5, Proseware, Inc
Overview
General Overview
Proseware, Inc., is an international manufacturing company that has 3,000 users. Proseware has a sales department, a marketing department, a research department, and a human resources department.
Proseware recently purchased a small competitor named Contoso, Ltd.
Physical Locations
Proseware has two offices. The offices are located in New York and London. The offices connect to each other by using a WAN link. Each office connects directly to the Internet. Contoso has one office in Chicago.
Existing Environment
Active Directory Environment
The network of Proseware contains an Active Directory forest named proseware.com. The forest contains a single domain and two sites named London and New York. Each site contains two domain controllers that run Windows Server 2008 R2. The domain controllers in the New York site are named DC1 and DC2. The domain controllers in the London site are named DC3 and DC4.
All FSMO roles are hosted on DC3 and DC4.
The network of Contoso contains an Active Directory forest named contoso.com. The forest contains five domain controllers and one site.
Exchange Server Organization
Proseware has an Exchange Server 2013 organization that contains two database availability groups (DAGs) named DAG-NYC and DAG-LON. The DAGs are configured as shown in the following table.
The certificate used for Exchange Server 2013 has a subject name of mail.proseware.com and a Subject Alternative Name (SAN) of autodiscover.proseware.com. Each mailbox database has three copies. All users connect to an active copy of the database on a server in their respective office. Native data protection is implemented. NTLM communication is used exclusively for Outlook Anywhere both internally and externally.

Problem Statements
Proseware identifies the following issues:

? Users report that sometimes, they fail to access the free/busy information of the other users. You also discover that some users fail to retrieve Autodiscover settings.

? Users in the London office report that during a 24-hour WAN outage, they could see only new users in the global address list (GAL) from Outlook Web App.

? The manager of the human resources department in the New York office cannot see new London office users in the GAL until several hours after the help desk confirms that the users were created.

? A hung MSExchangeOWAAppPool in Internet Information Services (IIS) on EX1 causes all of the database copies to fail over. Despite having the same CopyQueueLength and ReplayQueueLength as the copies on EX2, the copies on EX3, which have a higher activation preference, are activated, forcing user connections over the WAN.

? A custom application named App1 recently malfunctioned and sent hundreds of false positive email notifications that had a subject of System Alert: Sales Database Reaching Capacity to all of the users in the organization. While attempting to remove the email messages, an administrator ran the Search- Mailbox -DeleteContent command and erroneously deleted valid email messages from the mailboxes of some executives.

Requirements Business Goal
Proseware identifies the following business goals:

? Reduce the costs associated with using bandwidth on the WAN links.

? Improve social media integration by using a Microsoft Outlook app that will be deployed to all of the users in the sales department.

Planned Changes
Proseware plans to make the following changes:

? Implement a lagged copy for the mailbox database of the executives.

? Implement an RBAC-linked role group for the administrators at Contoso to manage the mailboxes of the Proseware users.

Technical Requirements
Proseware identifies the following technical requirements:

? End users must be notified after one hour if the email messages that they send are not delivered.

? If mailbox database storage fails, the IT department must be able to recover old email messages that were sent up to five days earlier to the mailboxes of the executives.

? All new users hired at Contoso must have a user account in contoso.com and an Exchange Server mailbox in proseware.com. All new user accounts in contoso.com must have a user principal name (UPN) that ends with proseware.com.

? Administrators at Contoso must be able to create and manage recipient objects in the Exchange Server organization of Proseware by using their existing contoso.com administrator account. All Contoso recipient objects must reside in an organizational unit (OU) named proseware.com

Security Requirements
The Chief Security Officer (CSO) introduces the following security requirements:

? All Outlook users who connect from the Internet must use Basic authentication only.

? All Outlook users who connect from the internal network must use NTLM authentication only.

SLA Requirements
Due to productivity losses during some recent maintenance windows, the Chief Information Officer (CIO) introduces a new service level agreement (SLA) requiring that all servers entering or exiting a maintenance window must be taken in and out of service properly.

The SLA contains the following requirements:

? All mounted databases on the server undergoing maintenance must be activated on another server.

? All message queues on the server undergoing maintenance must be empty before maintenance can begin.

? The server undergoing maintenance must not be activated while maintenance is occurring.

NEW QUESTION 4
You have an Exchange Server 2013 organization named adatum.com. The organization contains two servers named EX1 and EX2 that are configured as shown in the table.

<table>
<thead>
<tr>
<th>Server name</th>
<th>Role</th>
</tr>
</thead>
<tbody>
<tr>
<td>EX1</td>
<td>Mailbox, Client Access</td>
</tr>
<tr>
<td>EX2</td>
<td>Mailbox, Client Access</td>
</tr>
</tbody>
</table>

Both servers are members of a database availability group (DAG). EX1 has the active copy of a database named Database1. Several users who have mailboxes in Database1 discover that all of their outbound email messages remain in their Drafts folder when they use Outlook Web App.

You need to ensure that the email messages are delivered. What should you do?

A. On EX2, retry the message queues.
B. On EX1, start the Microsoft Exchange Mailbox Transport Submission service.  
C. On EX2, start the Microsoft Exchange Mailbox Transport Submission service.  
D. On EX1, retry the message queues.  

Answer: B

NEW QUESTION 5  
You have an Exchange Server 2013 organization that contains five servers.  
Your company has a finance department, a marketing department, and a research department.  
Users in the marketing department are prevented from creating more than two Exchange ActiveSync device associations.  
You have a user named User5 in the finance department.  

You need to prevent User5 from creating more than two Exchange ActiveSync device associations. Which cmdlet should you use?  

A. Set-ThrottlingPolicyAssociation  
B. Set-ResourcePolicy  
C. Set-ActiveSyncMailboxPolicy  
D. Set-CASMailbox  

Answer: A

NEW QUESTION 6  
You have an Exchange Server 2013 organization that contains two servers named EX1 and EX2. EX1 and EX2 are members of a database availability group (DAG) named DAG1.  

You need to identify the last several times that a mailbox database named MBX1 failed over from EX1 to EX2.  

What command should you run? To answer, select the appropriate options in the answer area. 

Answer: 

Explanation: References:  

NEW QUESTION 7  
You have an Exchange Server 2013 organization that contains two servers. The servers are configured as shown in the following table.  

You need to create a new database availability group (DAG) that contains EX1 and EX2. Which three actions should you perform?  

To answer, move the three appropriate actions from the list of actions to the answer area and arrange them in the correct order. 

Answer: 

Explanation: Box 1: Add the Exchange Trusted Subsystem universal security group to the local Administrators group on Server1.  
Box 2: Create a new DAG and specify Server1 as the file share witness.  
Box 3: Add EX1 and EX2 to the DAG.

NEW QUESTION 8
In Europe, your company has one main office and five branch offices. In Asia, the company has one main office and five branch offices. Each main office contains a data center. The network contains an Active Directory forest. The forest contains a single domain named contoso.com. Each office is configured as an Active Directory site. All client computers are joined to the domain.
You plan to deploy Exchange Server 2013 servers in both data centers.
You need to recommend a client connectivity solution that meets the following requirements:
Users who connect from the Internet must be configured automatically to connect to their mailbox by using Outlook Anywhere.
Users from the branch offices must use Outlook Anywhere to connect to the Client Access servers in their respective region.
What should you include in the recommendation?
A. A service connection point (SCP) in Active Directory and a host (A) record in the public DNS zone
B. A service location (SRV) record in the internal DNS zone and a service location (SRV) record in the public DNS zone
C. A service connection point (SCP) in Active Directory and an inbound port rule for TCP 389
D. A service location (SRV) record in the public DNS zone and an inbound port rule for TCP 389

Answer: B

NEW QUESTION 9
You have an Exchange Server 2013 on-premises organization and a Microsoft Office 365 tenant. All mailboxes are hosted on-premises.
You need to implement an archiving solution for all users. The solution must ensure that all mailbox content older than 18 months is moved to Personal Archives in Office 365.
What should you implement?
A. a retention policy and a retention policy tag (RPT)
B. a retention hold and a retention policy tag (RPT)
C. a retention policy and a personal tag
D. a retention policy and a default policy tag (DPT)

Answer: D

NEW QUESTION 10
You have an Exchange Server 2013 organization that contains two Client Access servers named CAS1 and CAS2. You deploy an Active Directory forest. The forest contains a single domain named contoso.com. Each office is configured as an Active Directory site. All client computers are joined to the domain. You plan to deploy Exchange Server 2013 servers in both data centers. You need to recommend a client connectivity solution that meets the following requirements:
Users who connect from the Internet must be configured automatically to connect to their mailbox by using Outlook Anywhere.
Users from the branch offices must use Outlook Anywhere to connect to the Client Access servers in their respective region.
What should you include in the recommendation?
A. A service connection point (SCP) in Active Directory and a host (A) record in the public DNS zone
B. A service location (SRV) record in the internal DNS zone and a service location (SRV) record in the public DNS zone
C. A service connection point (SCP) in Active Directory and an inbound port rule for TCP 389
D. A service location (SRV) record in the public DNS zone and an inbound port rule for TCP 389

Answer: B

NEW QUESTION 11
You have an Exchange Server 2013 organization.
You plan to assign the default workload management policy to all of the servers in the organization.
You need to remove the Calendar Synchronization Assistant workload from the workload management policy before you assign the policy to the servers.
Which cmdlet should you run?
A. Remove-ResourcePolicy
B. Set-ResourcePolicy
C. Set-WorkloadPolicy
D. Remove-WorkloadPolicy

Answer: D

NEW QUESTION 12
Your company has four regional offices and 20 branch offices. The regional offices connect to each other by using a 30-Mbps WAN link. Each branch office connects to its nearest regional office by using a 1-Mbps WAN link. The network contains an Active Directory forest. The forest contains a domain controller in each office. Each office maps to an Active Directory site. Each branch office site connects to the nearest regional office site by using an Active Directory site link. You have an Exchange Server 2013 organization that contains one server in each office. You need to implement a messaging solution to meet the following requirements:
The users in the branch offices must only be able to send email messages that are up to 2 MB to the users in the other offices. The users in the regional offices must be prevented from sending email messages that are larger than 5 MB to the users in any of the regional offices.
Which cmdlet should you run?
A. Set-TransportRule
B. Set-ADSite
C. Set-AdSiteLink
D. Set-RoutingGroupConnector

Answer: C
NEW QUESTION 13
You have an Exchange Server 2013 on-premises organization and a Microsoft Office 365 tenant. All mailboxes are hosted on-premises.
You need to implement an archiving solution for all users. The solution must ensure that all mailbox content older than 18 months is moved to Personal Archives in Office 365.
Which two feature should you implement? Each correct answer presents part of the solution.

A. a retention policy tag (RPT)
B. a default policy tag (DPT)
C. a retention policy
D. a personal tag
E. a retention hold

Answer: CE

NEW QUESTION 14
You have an Exchange Server 2013 organization that contains two servers named EX1 and EX2.
EX1 and EX2 are the members of a database availability group (DAG) named DAG1. DAG1 contains two mailbox databases named DB1 and DB2. DB1 is active on EX1. DB2 is active on EX2.
A disk on EX2 fails. DB2 fails over to EX1.
Users who have mailboxes in DB2 report that Microsoft Outlook can no longer connect to the Exchange Server organization.
You discover that DB2 is dismounted on EX1.
When you attempt to mount DB2 on EX1, the operation fails. You need to identify what prevents DB2 from mounting on EX1. What should you do?

A. Run the Resume-MailboxDatabaseCopy cmdlet.
B. Run the Update-MailboxDatabaseCopy cmdlet.
C. Run the eseutil.exe command and specify the A parameter.
D. Run the eseutil.exe command and specify the/mft parameter.

Answer: B

NEW QUESTION 15
You have an Exchange Server 2013 organization that contains 5,000 mailboxes. A user named User1 tests several Windows Phone devices.
You need to ensure that User1 can connect more than 20 Windows Phone devices to his mailbox.
Which cmdlet should you run?

A. Set-ThrottlingPolicy
B. Set-MobileMailboxPolicy
C. Set-ActiveSyncMailboxPolicy
D. Set-CasMailbox

Answer: A

NEW QUESTION 16
You have an Exchange Server 2013 organization.
You are troubleshooting an email delivery problem.
You need to disable temporarily the antimalware scanning on a server that has Exchange Server 2013 installed. The solution must ensure that the antimalware engine continues to download updates.
What should you run?

A. The Set-TransportConfig cmdlet
B. The New-MalwareFilterPolicy cmdlet
C. The Disable-Antimalwarescanning.psl script
D. The Set-MalwareServer cmdlet

Answer: D

NEW QUESTION 17
You have an Exchange Server 2013 organization. The organization contains four servers in the same Active Directory site. The servers are configured as shown in the following table.

<table>
<thead>
<tr>
<th>Server name</th>
<th>Role</th>
</tr>
</thead>
<tbody>
<tr>
<td>EX1</td>
<td>Client Access server</td>
</tr>
<tr>
<td>EX2</td>
<td>Client Access server</td>
</tr>
<tr>
<td>EX3</td>
<td>Mailbox server</td>
</tr>
<tr>
<td>EX4</td>
<td>Mailbox server</td>
</tr>
</tbody>
</table>

EXB and EX4 are members of a database availability group (DAG) named DAG1. All users use Microsoft Outlook 2013 to connect to their mailbox.
You need to recommend a client access solution to ensure that all of the users can connect to their mailbox if EX1 or EX2 fails.
What should you recommend?

A. Add a layer 4 hardware load balancer that balances RPC traffic
B. Add a layer 7 hardware load balancer that balances the traffic on port 443.
C. Add a layer 7 hardware load balancer that balances RPC traffic.
D. Replicate all of the databases in DAG1 to both DAG1 members.

Answer: B
NEW QUESTION 18
You have an Exchange Server 2013 organization that contains several servers in a single site. You run the Get-TransportConfig cmdlet and you receive the following output.

AddressBookPolicyRoutingEnabled : False
AnonymousSenderToRecipientRatePerHour : 1800
ClearCategories : True
ConvertThreadedMessagetoHtml : False
DNConversionMode : UseExchangeDNS
ExternalDelayDomainEnabled : True
ExternalDsDefaultLanguage : 
ExternalDsLanguageDetectionEnabled : True
ExternalDsMaxMessageAttackSize : 10 MB (10,485,760 bytes)
ExternalDsReportingAuthority : 
ExternalDsSendHtml : True
ExternalPostmasterAddress : 
GenerateCopyOfDelivery : 
HygieneSuite : Standard
InternalDelayDomainEnabled : True
InternalDsDefaultLanguage : 
InternalDsLanguageDetectionEnabled : True
InternalDsMaxMessageAttackSize : 10 MB (10,485,760 bytes)
InternalDsReportingAuthority : 
InternalDsSendHtml : True
InternalSMTPServers : ()
JournalingReportHtml : 
LegacyJournalingMigrationEnabled : False
LegacyArchiveJournalingEnabled : False
LegacyArchiveLiveJournalingEnabled : False
MessageHoldTime : 2:00:00:00
MessageHeartbeatFrequency : 0:0:2:00
MessageAutoDiscardInterval : 2:00:00:00
MessagePreferenceSetting : PreferRemote
MessageRedundancyEnabled : True
MessageSubmitTimeSpan : 0:0:0:0
ExchangeTags : (Reject, Allow)
TSAResolveDomainSecureList : ()
TSAResendDomainSecureList : ()
VerifySecureSubmitEnabled : False
VolcanoMailJournalingEnabled : True
XenaServerEnabled : True

Use the drop-down menus to select the answer choice that completes each statement.

Answer:

- Box 1: make a shadow copy of the message on another server
- Box 2: two days

Explanation: Box 1: make a shadow copy of the message on another server Box 2: two days

NEW QUESTION 19
Your network contains an Active Directory forest. The forest contains a single domain named contoso.com. You have an Exchange Server 2013 organization named Contoso.

You plan to create an additional SMTP domain named sales.contoso.com. You will use sales.contoso.com as the primary SMTP address for the users in the sales department.

You create a new email address policy and apply the policy to the sales users.

New sales users report that when they attempt to access their email from the Internet for the first time by using Microsoft Outlook 2010, they fail to connect. The sales users connect to their mailbox internally successfully by using Outlook 2010. All other users can connect to their mailbox from the Internet and internally.

You need to ensure that the new sales users can connect to the Exchange Server 2013 organization by using Outlook Anywhere from the Internet.

Which two actions should you perform? (Each correct answer presents part of the solution. Choose two.)

A. Modify each existing Service Connection Point (SCP) object in Active Directory to point to autodiscover.sales.contoso.com.
B. From DNS Manager, create a host (A) record for autodiscover.sales.contoso.com.
C. On the Client Access servers, deploy a new certificate that includes the autodiscover.sales.contoso.com name.
D. Create a new Autodiscover virtual directory on the Client Access servers and configure ExternalURL to use autodiscover.sales.contoso.com.
E. Create a new Service Connection Point (SCP) object in Active Directory that points to autodiscover.sales.contoso.com.

Answer: BC

NEW QUESTION 20
Your network contains an Active Directory forest. The forest contains two sites named Montreal and New York.

You have an Exchange Server 2013 organization that contains a Mailbox server and a Client Access server in each site.
The users in the New York site report that the offline address book (OAB) is not updated after an extended WAN outage between the sites. The Montreal site contains the OAB generation server.

You need to ensure that the New York site users download the OAB from a server in the New York site. Which two cmdlets should you run? (Each correct answer presents part of the solution. Choose two.)

A. Set-Mailbox
B. New-OfflineAddressBook
C. New-Mailbox
D. New-OabVirtualDirectory
E. Set-OfflineAddressBook

**Answer:** AC
