Microsoft

Exam Questions 70-347

Enabling Office 365 Services
NEW QUESTION 1

Your company has a hybrid deployment of Office 365. You need to identify which certificate is used for token signing between the on-premises environment and Office 365. Which tool should you use?

A. The Exchange Management Console.
B. The AD FS 2.0 Management console.
C. The Active Directory Domains and Trusts snap-in.
D. The Office 365 portal.
E. The Certificates snap-in.

Answer: B

Explanation:
AD FS creates a self-signed certificate by default. You are able to modify this certificate to a CA-issued certificate by using the AD FS management snap-in. Therefore, it stands to reason that to identify which certificate is used for token signing between the on-premises environment and Office 365, you would have to access the AD FS 2.0 Management console.

NEW QUESTION 2

A company uses Office 365 ProPlus. The company has a main office and a remote office. The remote office experiences occasional bandwidth issues. You must deploy Visio Pro for Office 365 to selected users in a satellite office that experiences bandwidth issues. You need to deploy Visio Pro for Office 365 to a specific set of users. What should you do?

A. Download the installer to a local network share and use the Office Deployment Tool to deploy the application to clients.
B. Use the Office 365 portal to allow users to deploy Visio Pro.
C. Use the Office 365 portal to allow users to deploy Office 365 ProPlus.
D. Download the installer to each local machine and use the Office Deployment Tool to deploy the application to the client.

Answer: A

Explanation:
To deploy Office 365 ProPlus from an on-premises location, such as a local network share, you'll have to use the Office Deployment Tool to download the Office 365 ProPlus software from Office 365.

NEW QUESTION 3

You are the Office 365 administrator for your company. Any communication to the Internet using a port other than 80 requires a unique firewall rule to be configured. You successfully deploy Office 365 ProPlus to all users by using Click-to-Run for Office 365. Users install and activate Office 365 ProPlus. Thirty days after activation, users report that they are unable to edit files by using any Office applications. You need to ensure that users can edit files. For which site should you configure a firewall exception?

A. https://activation.sls.microsoft.com
B. https://ols.officeapps.live.com/olsc
C. http://ols.officeapps.live.com/olsc
D. http://officecdn.microsoft.com

Answer: A

Explanation:
The activation.sls.microsoft.com url is needed to renew the product key approximately every 30 days for Office 365 ProPlus users.

NEW QUESTION 4

DRAG DROP

Your company uses Microsoft Exchange Online. End users access their mailboxes by using Outlook Web App (OWA). The company is deploying an end-user request process for new shared mailboxes. When a user requests a shared mailbox, a corresponding group must also be created. The requestor will manage the group membership in OWA to allow other users access to the shared mailbox. You are creating a Windows PowerShell script to meet the following requirements:

?Create a shared mailbox that has the requested display name and email address.
?Create a group and make the requestor both the owner and a member of the group.
?Assign full control for the shared mailbox to the group.

The script currently includes the following Windows PowerShell script segment:
You need to complete the Windows PowerShell script. How should you complete the script? To answer, drag the appropriate cmdlets to the correct targets. Each cmdlet may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

| Box 1: | The New-Mailbox cmdlet is used to create a new mailbox. The values stored in the variables provide the information required to complete the command. |
| Box 2: | The New-DistributionGroup cmdlet is used to create a new distribution group. The values stored in the variables provide the information required to complete the command. |
| Box 3: | The Add-MailboxPermission cmdlet is used to assign the distribution group full control access to the shared mailbox. The values stored in the variables provide the information required to complete the command. |
| Box 4: | The Add-DistributionGroupMember cmdlet is used to add the mailbox requestor to the distribution group. The values stored in the variables provide the information required to complete the command. |

**NEW QUESTION 5**

**DRAG DROP**

Your company has an Office 365 subscription and uses Microsoft Exchange Online. Some employees have archive mailboxes that have the default retention policy applied. The default retention policy does not meet the latest company requirements. You create a retention policy named RetentionPolicy1 and apply the necessary retention tags to the policy. You need to apply the new retention policy to all archive mailboxes and ensure that the new retention policy tags are applied as soon as possible.

Which three Windows PowerShell commands should you run in sequence? To answer, move the appropriate commands from the list of commands to the answer area and arrange them in the correct order.

<table>
<thead>
<tr>
<th>New-Mailbox</th>
<th>New-DistributionGroup</th>
<th>Add-MailboxPermission</th>
<th>Add-RecipientPermission</th>
<th>Add-DistributionGroupMember</th>
<th>New-MsolGroup</th>
<th>Enable-Mailbox</th>
</tr>
</thead>
<tbody>
<tr>
<td>-Name $SmbName -PrimarySmtpAddress $SmbName</td>
<td>-Alias $Alias -Displayname $displayname -Shared</td>
<td>-Displayname $Displayname -shared</td>
<td>-GroupDisplayname $GroupName -Displayname $GroupDisplayName</td>
<td>-Identity $SmbName -User $GroupName</td>
<td>-Identity $Groupname -Member $requestorUPN</td>
<td>-AccessRights FullAccess</td>
</tr>
</tbody>
</table>
NEW QUESTION 6
You are the Office 365 administrator for your company. The company uses Microsoft Skype for Business Online and wants to customize Skype for Business meeting invitations. You need to identify the URLs that can be changed on the Lync meeting invitations from the Lync admin center. Which three URLs can be changed? Each correct answer presents part of the solution. NOTE: Each correct selection is worth one point.

A. Company URL
B. Meeting URL
C. Legal URL
D. Logo URL
E. Help URL

Answer: CDE

Explanation:
When customizing meeting invitations, you are able to change the Logo, Help, and Legal URIs, as well as the Footer text.

NEW QUESTION 7
You manage an Office 365 tenant that uses an Enterprise E1 subscription. A user takes an extended leave of absence. The user reports that email messages in the Junk Email folder are deleted before they can read the messages. You need to ensure that email messages for the user's Junk Email folder are deleted after 60 days. Which Windows PowerShell cmdlet should you run first?

A. Enable-JournalRule
B. New-RetentionPolicyTag
C. Start-ManagedFolderAssistant
D. Set-CsUser
E. Set-CsPrivacyConfiguration

Answer: B

Explanation:
Retention Policy Tags are used to apply retention settings to folders and individual items such as e-mail messages. These settings specify how long a message remains in a mailbox and the action to be taken when the message reaches the specified retention age. A Retention Policy is a group of retention tags that can be applied to a mailbox.

Box 1: The Get-Mailbox cmdlet retrieves a list of mailboxes. The -Filter {((ArchiveStatus –eq ‘Active’))} statement filters the list of retrieved mailboxes to list only the mailboxes that have Archiving enabled and active.

Box 2: The Set-Mailbox cmdlet is used to assign the retention policy to the mailboxes retrieved in step 1.

Box 3: The Start-ManagedFolderAssistant cmdlet is used to immediately start messaging records management (MRM) processing of mailboxes. This will immediately apply the new retention policy.

NEW QUESTION 8
You are the Office 365 administrator for your company. You need to configure Microsoft Skype for Business Online to disable alerts for voicemail and instant messages to Windows Phones. What should you do?

A. In the Lync admin center, disable public IM connectivity.
B. Use the Set-CsPushNotificationConfiguration Windows PowerShell cmdlet.
C. Use the Set-CsOnlineUser Windows PowerShell cmdlet.
D. In the Lync admin center, select the Display presence information only to a user's contacts option.

Answer: B

Explanation:
Push notifications, in the form of badges, icons, or alerts, can be sent to a Windows Phone even when the mobile application is inactive. Push notifications notify a user of events such as a new or missed IM invitation and voice mail. You can enable or disable push notifications for Windows Phone devices by using either Lync Server 2013 Control Panel or Lync Server 2013 Management Shell.

To disable push notifications for Windows Phone set the value of the EnableMicrosoftPushNotificationService property to False ($False). For example:

```
Set-CsPushNotificationConfiguration -Identity "site:Redmond" - EnableMicrosoftPushNotificationService $False
```

NEW QUESTION 9
Your company is planning to migrate to Microsoft Exchange Online. The company employs 1,000 people, each with a mailbox currently located on Exchange 2010 on-premises. You estimate that it will take a minimum of four weeks to migrate all mailboxes from on-premises Exchange to Exchange Online.

The company has the following migration requirements:
- During the migration, do not change the existing Microsoft Outlook profiles and .ost files used by the employees.
- Ensure that email messages sent between on-premises mailboxes and online mailboxes during the migration are secure.
- Do not send email messages between on-premises mailboxes and online mailboxes over the Internet in plain text.

You need to select the migration strategy that meets the requirements. Which migration strategy should you use?

A. Cutover migration only
B. IMAP migration only
C. Remote move migration only
D. Staged migration only

Answer: C

Explanation:
In this question, we are migrating the mailboxes over a period of time (minimum of four weeks). During the migration period, we will have a hybrid deployment where the Exchange environment exists both on-premise and online.

To meet the requirements of the question, we can use a remote move migration. A remote move migration is used to migrate on-premises Exchange mailboxes to Exchange Online in an Exchange hybrid deployment. You must have an Exchange hybrid deployment to use a remote move migration. With a hybrid deployment, you get the following capabilities:

Even if you plan to permanently move your on-premises email organization to Exchange Online and Office 365 over a longer period of time, you can take advantage of these hybrid deployment features during the transition.

NEW QUESTION 10
You need to implement the planned change for user2. Which three commands will achieve the goal? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

A. Set-Mailbox AcctUser2- PrimarySmtpAddress User2@contoso.com
B. Set-Mailbox AcctUser2- EmailAddresses @('v=SMTP; User2@contoso.com'; 'smtp:Acctuser2@contoso.com'; '-v=SMTP; AcctUser2@cor' C. Set-Mailbox AcctuUser2- EmailAddress @Add= 'SMTP:User2@contoso.com'
D. Set-Mailbox AcctUser2 – EmailAddresses @{+ = 'smtp:User2@contoso.com'}
E. Set-Mailbox Acct User2- WindowsEmailAddress User2@contoso.com

Answer: ACE

Explanation:

NEW QUESTION 11
Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution. Determine whether the
solution meets the stated goals.
Solution: You run the Set-OWAVirtualDirectory. Does this meet the goal?

A. Yes
B. No

Answer: B

Explanation:

NEW QUESTION 12
NOTE: This question is part of a series of questions that present the same scenario. Each question in the series holds a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.
After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.
You need to configure external user sharing for One Drive.
Solution: You set the value of the OneDrive default link type option to Internal. Does the solution meet the goal?

A. Yes
B. No

Answer: B

Explanation:
References: https://support.office.com/en-us/article/manage-sharing-in-onedrive-and-sharepoint-ee8b91c5-05ec-44c2-9796-78fa27ec8425

NEW QUESTION 13
Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution. Determine whether the solution meets the stated goals.
You need to modify the existing environment to meet the technical requirement for Outlook on the web.
Solution: You run the Set-OWAMailboxPolicy command. Does this meet the goal?

A. Yes
B. No

Answer: B

Explanation:
The Set-CASMailbox command, not the Set-OWAMailboxPolicy command, must be used to disable Outlook Web App.
From scenario: The executive management at Contoso wants to prevent users from accessing their Exchange Online mailbox by using Outlook on the web.
Note: You can use the EAC or the Shell to enable or disable Outlook Web App for a user mailbox. When Outlook Web App is enabled, a user can use Outlook Web App to send and receive email. When Outlook Web App is disabled, the mailbox will continue to receive email messages, and a user can access it to send and receive email by using a MAPI client, such as Microsoft Outlook, or with a POP or IMAP email client, assuming that the mailbox is enabled to support access by those clients.

NEW QUESTION 14
Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.
After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.
You need to recommend a solution to implement the planned change for the email addresses of the New York office managers.
Solution: From the Exchange Online module, run the Set-Mailbox cmdlet and specify the - EmailAddresses parameter. Does this meet the goal?

A. Yes
B. No

Answer: A

Explanation:
The Set-Mailbox cmdlet is used to modify the settings of existing mailboxes. Including the – EmailAddresses parameter allows you to specify all the email addresses (proxy addresses) for the recipient, including the primary SMTP address.

NEW QUESTION 15
This is a case study. Case studies are not timed separately. You can use as much exam time as you would like to complete each case. However, there may be additional case studies and sections on this exam. You must manage your time to ensure that you are able to complete all questions included on this exam in the time provided.
To answer the questions included in a case study, you will need to reference information that is provided in the case study. Case studies might contain exhibits and other resources that provide more information about the scenario that is described in the case study. Each question is independent of the other questions in this case study.
At the end of this case study, a review screen will appear. This screen allows you to review your answers and to make changes before you move to the next section of the exam. After you begin a new section, you cannot return to this section.
To start the case study
To display the first question in this case study, click the Next button. Use the buttons in the left pane to explore the content of the case study before you answer the questions. Clicking these buttons displays information such as business requirements, existing environment, and problem statements. Note that the information displayed on the All information tab is identical to the information displayed on the subsequent tabs. When you are ready to answer a question, click the Question button to return to the question.
Overview
Fabrikam, Inc. is a medical billing clearing house that recently migrated from on-premises services to Office 365. The company has two offices. One office is in Atlanta, and one office is in Chicago. Accounting, IT, and claims department users are located in the Atlanta office. Enterprise E3 licenses are assigned to all users. The current Site Collection administrator is Admin1.

Sales department users are located in the Chicago office only. The sales department plans to offer quarterly sales reviews with existing and potential customers. Up to 2,000 people are expected to attend each meeting.

All users have access to the following Office 365 services: Business Requirements
Document sharing policy
Quarterly review meetings must be recorded and made available online for later viewing.
Office applications
You identify the following requirements for supporting Office applications on all corporate devices:
Atlanta office
You identify the following requirements to support users in the Atlanta office. Sales department
You identify the following requirements to support users in the sales department: Accounting department
The accounting department must be able to set permissions for their own sites. User accounts named User1 and Admin1 must be notified if the storage for accounting users reaches 80 percent of the 1 terabyte (TB) limit.
You are unable to configure storage for the accounting department. The Site Collection ribbon for the accounting department site collection is shown below.

![Site Collections](image)

Claims department
The claims department frequently receives email that contain attachments. The approved list of attachment types includes:
Other attachment types must be removed from email messages. If an attachment is removed, the original sender must be notified that their attachment was removed.
IT department
The IT department must be able to create eDiscovery cases. You must use eDiscovery to search email and conversations in the tenant.
eDiscovery case
The IT department must manage an eDiscovery case for the claims department. You must add the following user accounts as members of the case:
The case must have a hold placed on the Claims1 mailbox.
Note: This question is part of a series of questions that use the same scenario. For your convenience, the scenario is repeated in each question. Each question presents a different goal and answer choices, but the text of the scenario is exactly the same in each question in this series.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.
You need to configure the sales meetings.
Solution: Add the PSTN Conferencing add-on to the sales department users. Does the solution meet the goal?

A. Yes
B. No

Answer: A

Explanation:
PSTN Conferencing lets you dial into the meeting with your phone. Just call a specific number and you’re in the meeting. The PSTN Conferencing feature enables you to create the dial-in number (or numbers) within Skype for Business.
From Scenario: Quarterly review meetings must be recorded and made available online for later viewing.

NEW QUESTION 16

You need to configure the sales meetings.

Solution: Add the PSTN Calling add-on to the sales department users. Does the solution meet the goal?

A. Yes
B. No

Answer: B

Explanation:

Calling Plans are an add-on telephone service that, when combined with Phone System in Office 365, can become the phone system for your entire organization. A Calling Plan provides the people in your business with a primary phone number, and lets them make and receive phone calls outside of your organization.

From Scenario: Quarterly review meetings must be recorded and made available online for later viewing.

References: https://support.office.com/en-us/article/What-are-Calling-Plans-in-Office-365-3dc773b9-95e0-4448-b2f1-887c54022429

Case Study: Datum Corporation

OverView

Datum Corporation has a single-domain Active Directory forest. The company has the following locations:

<table>
<thead>
<tr>
<th>Locations</th>
<th>Servers</th>
</tr>
</thead>
<tbody>
<tr>
<td>Boston</td>
<td>DenSccM</td>
</tr>
<tr>
<td>Chicago</td>
<td>DenSccM</td>
</tr>
<tr>
<td>Denver</td>
<td>DenSccM</td>
</tr>
<tr>
<td>Seattle</td>
<td>DenSccM</td>
</tr>
</tbody>
</table>

Each location has four member servers that run Windows Server 2016 Standard. Datum Corporation has on-premises deployments of Microsoft SQL Server, SharePoint Server, Exchange Server, and SCCM. The Exchange deployment is configured for hybrid coexistence with Exchange Online. The company plans to retire the on-premises Exchange servers. The on-premises SharePoint deployment will continue to be operated as an Intranet site for A. Datum Corporation employees.

All corporate-owned systems are managed by using SCCM.

Office 365

All departments and projects are represented by Office 365 groups.

You plan to deploy Microsoft Teams with all add-on components disabled. You plan to use Microsoft PowerApps to build custom business apps that can be used across web and mobile environments by the corporate users. Your company publishes several PowerApps templates for use by employees. You plan to deploy Microsoft StaffHub using a default configuration. All add-ons and external features for Teams are disabled.

Requirements: Office Applications

You identify the following requirements for Office 365 applications and services:

- **All users must have the ability to run Office 365 ProPlus.** Only members of the software development team must be able to use Microsoft Access.
- **All department managers must be able to create team sites in SharePoint Online.** You must be able to independently configure usage limits for each SharePoint Online site collection.
- **All users must have an Office 365 license to access StaffHub.**
- **You must that employees who do not have Teams installed can view conversations by using a different Office application.**
- **Employees must be able to create apps from PowerApp templates without the need for administrative intervention.**
- **You must configure Office 365 to review all outbound communications from members of the marketing group.** All communication reviews will be sent to the legal team.

Users

All user accounts in Office 365 must be created through direct administrative action. Automated account creation is not permitted.

Desktop Management

All BYOD devices must be managed by SCCM using Microsoft Intune. All software installations must be managed by SCCM. All desktop computers must run Windows 10 Enterprise.

Server Distribution

All services must be offered, managed, and configured on servers in the location where the activity takes place. You must use software that does not require specific licensing whenever possible. All software required to support services offered must be installed and tested prior to installing any components of the
applications that will use it.

Data Privacy Customer data

Information about customers and this information must be protected. You must prevent customer id numbers, account numbers and phone numbers from inclusion in SharePoint site content. You must ensure that employees can include this information in emails.

Skype for Business Online

Skype for Business Online must only show an employees presence status to others in the company and people the user has specifically added to Skype for Business Online. Employees must be able to send mail and chat with any employees from any company. Employees must be allowed to set up meetings with other employees. They must not be able to hold webinars or other meetings with people outside the organization.

NEW QUESTION 17
HOTSPOT
You need to configure Skype for Business Online.
Which configuration settings should you use? To answer, select the appropriate option in the answer area.
NOTE Each correct selection is worth one point.

A. Mastered
B. Not Mastered

Answer: A

Explanation:

NEW QUESTION 18
You have an Office 365 subscription.
A new compliance policy requires that a Microsoft Exchange Server administrator must be able to search all user email messages.
You add the Exchange administrator to the Discovery Management role group. You need to deploy an eDiscovery Center in Microsoft SharePoint Online.
Which three actions should you perform? Each correct answer presents part of the solution. NOTE: Each correct selection is worth one point.

A. From the Site settings of the eDiscovery Center, add the Exchange administrator as an owner of the eDiscovery Center.
B. From search in the SharePoint admin center, add Exchange Online as a Result Resources.
C. From the Site settings of the eDiscovery Center, add Exchange Online as Result Resources.
D. From the SharePoint admin center, create an eDiscovery Center as a site collection.

NEW QUESTION 19
DRAG DROP
You are the Office 365 administrator for a company. The company plans to release a new product.
You are provided with a Microsoft Excel workbook that has a list of terms associated with the product.
You need to ensure that emails that contain any of the terms cannot leave the company.
Which four actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.
A. Mastered
B. Not Mastered

Answer: A

Explanation:
In the Office 365 Security & Compliance Center, use the New-DlpSensitiveInformationTypeRulePackage cmdlet.
Upload your rule package

> To upload your rule package, do the following.
> 1. Save it as an .xml file with Unicode encoding.
> 2. Connect to the Office 365 Security & Compliance Center using remote PowerShell
> 4. Make sure that you use the file location where your rule pack is actually stored. C:\custompath is a placeholder.
> 5. To confirm, type Y, and then press ENTER.

NEW QUESTION 20
You administer the Office 365 tenant for an organization. You assign Enterprise E5 licenses to all users. A partner organization reports that they are not receiving email from your organization.
You must ensure that the partner organization can receive emails from your organization. The solution must meet the following requirements:
• It must be implemented as a component of the message header.
• It must not require any user intervention or the creation of DNS records.
You need to configure your Office 365 environment to ensure that the partner organization can receive emails from your organization.
Which Security & Compliance feature in Office 365 should you implement?

A. Secure Policy Framework (SPF) record
B. Domain-based Messaging and Reporting Compliance (DMARC)
C. DomainKeys Identified Mail (DKIM)
D. data loss prevention (DLP) policy

Answer: A
