

# Microsoft

## Exam Questions 70-467

Designing Business Intelligence Solutions with Microsoft SQL Server  
2012

Version: Demo

1. You need to identify changes in the financial database. What should you do?

- A. Add SQL Server replication to each table.
- B. Extract data from the current partition of each table.
- C. Add a timestamp column to each table.
- D. Perform a full extract of each table.
- E. Enable change data capture on each table.

**Answer: E**

2. You need to create the Package Activity report.

What should you do?

- A. Create a log table and use SSIS event handlers to write to the log table. Then create an SSRS report that uses the log table.
- B. Use the SSIS log provider for SQL Server. Then create an SSRS report that uses the sysssislog table.
- C. Create a log table and build a custom log provider to write to the log table. Then create an SSRS report that uses the log table.
- D. Create an SSRS report that uses thecatalog.executions and catalog.execution\_data\_statistics views.

**Answer: D**

3. You need to implement the aggregation designs for the cube.

What should you do?

- A. Use the CREATE CACHE statement.
- B. Use the Aggregation Design Wizard.
- C. Create relational indexes on the source tables.
- D. Use the Usage-Based Optimization Wizard.

**Answer: B**

4. You need to implement security in the cube to limit the sites visible to each user.

What should you do?

- A. Create an SSAS database role in the cube for each user and assign the sites each user can access to his

or her database role.

B. Create an SSAS server role for each user and assign the sites each user can access to his or her server role.

C. Create an SSAS database role and define a Multidimensional Expressions (MDX) calculation to implement dynamic dimension security.

D. Create a view on the SalesTransactions table that uses the SecurityFilter and User table data to limit the sites for each user.

**Answer: C**

5. You need to implement the aggregation designs for the cube.

What should you do?

A. Use the Usage-Based Optimization Wizard.

B. Use the Aggregation Design Wizard.

C. Partition the cube by month.

D. Implement cache warming in SSAS via an SSIS package.

**Answer: B**

6. You need to restrict access to data in the tables in the data warehouse.

What should you do?

A. Configure column-level permissions.

B. Configure database roles.

C. Create views and grant permissions to the views.

D. Configure application roles.

**Answer: C**

7. You need to select the appropriate storage settings for the cube.

Which settings should you choose?

A. Relational OLAP (ROLAP) with proactive caching enabled

B. Multidimensional OLAP (MOLAP) with proactive caching enabled and a rebuild interval of 24 hours

- C. Hybrid OLAP (HOLAP) with proactive caching disabled
- D. Hybrid OLAP (HOLAP) with proactive caching enabled

**Answer: C**

8. You need to slice data by the CouponUsed, OnSale, and Closeout columns.

What should you do?

- A. Create one linked dimension for each column.
- B. Create one degenerate dimension.
- C. Create one role-playing dimension.
- D. Create one junk dimension.

**Answer: D**

9. You need to configure a parameter for the database connection string. What should you do?

- A. Use a required package parameter.
- B. Use a required project parameter.
- C. Use a package configuration.
- D. Use a global variable.

**Answer: B**

10. You need to identify changes in the financial database.

What should you do?

- A. Add SQL Server log shipping to each table.
- B. Add SQL Server mirroring to each table.
- C. Perform a full extract of each table.
- D. Enable change data capture on each table.
- E. Create an AlwaysOn Availability Group that includes all the tables.

**Answer: D**

11. You need to ensure that you can monitor the usage data.

What should you do?

- A. In SharePoint Central Administration, enable usage data collection.
- B. In the PowerPivot Configuration Tool, repair PowerPivot for SharePoint.
- C. In the PowerPivot Configuration Tool, upgrade PowerPivot for SharePoint.
- D. In Reporting Services Configuration Manager, enable report execution logging.

**Answer: A**

12. You need to select the appropriate mode for the Sales database.

Which mode should you select?

- A. ROLAP
- B. Direct Query
- C. MOLAP
- D. In-Memory

**Answer: B**

13. You need to design the dimCustomers table.

Which design approach should you use?

- A. Reference dimension
- B. Type 2 slowly changing dimension
- C. Junk dimension
- D. Conformed dimension
- E. Type 1 slowly changing dimension

**Answer: B**

14. You need to improve the performance of data warehouse queries.

What should you do?

- A. Create columnstore indexes.

- B. Create clustered indexes.
- C. Create indexed views.
- D. Create bitmap indexes.

**Answer: A**

15. You need to create the factCustomerContact table.

Which type of table should you create?

- A. A fact table with a non-additive measure
- B. A factless fact table
- C. A periodic snapshot fact table
- D. A fact table with an additive measure

**Answer: B**

16. You need to select a method of moving data from the staging tables to the factOrders table.

What type of Transact-SQL (T-SQL) statement should you use?

- A. INSERT INTO...SELECT
- B. SELECT...INTO
- C. ALTER PARTITION-SWITCH
- D. ALTER PARTITION FUNCTION
- E. ALTER TABLE...SWITCH

**Answer: E**

17. You need to implement a strategy for efficiently storing sales order data in the data warehouse.

What should you do?

- A. Separate the factOrders table into multiple tables, one for each month that has orders, and use a local partitioned view.
- B. Separate the factOrders table into multiple tables, one for each day that has orders, and use a local partitioned view.
- C. Create daily partitions in the factOrders table.

D. Create monthly partitions in the factOrders table.

**Answer: C**

18. You need to select the appropriate model type for the Finance database.

Which model type should you select?

- A. Star schema
- B. Multidimensional
- C. Relational
- D. Tabular with PowerPivot

**Answer: B**

19. You need to configure permissions for the Customers dimension.

What should you do? (Each correct answer presents a complete solution. Choose all that apply.)

- A. In SQL Server Management Studio, configure the BusinessUsers role to disallow the reading of all definitions.
- B. In SQL Server Data Tools, configure the BusinessUsers role to disallow the reading of the Customers dimension definition.
- C. In SQL Server Management Studio, deny the member set for the Customers dimension data by using the Multidimensional Expressions (MDX) expression Filter([BusinessUsers]).
- D. In SQL Server Management Studio, configure the BusinessUsers role to disallow the reading of the Customers dimension definition.

**Answer: B,D**

20. You need to select and configure a tool for the monitoring solution.

What should you choose?

- A. Performance Monitor configured with the MSAS11:Storage Engine Query counter
- B. Performance Monitor configured with the MSAS11:Processing counter
- C. SQL Server Profiler configured with the Query Processing: Query Subcube event
- D. SQL Server Profiler configured with the Queries Events: Query Begin event

**Answer: A**

## Thank You for Trying Our Product

### We offer two products:

1st - We have Practice Tests Software with Actual Exam Questions

2nd - Questions and Answers in PDF Format

### 70-467 Practice Exam Features:

- \* 70-467 Questions and Answers Updated Frequently
- \* 70-467 Practice Questions Verified by Expert Senior Certified Staff
- \* 70-467 Most Realistic Questions that Guarantee you a Pass on Your FirstTry
- \* 70-467 Practice Test Questions in Multiple Choice Formats and Updatesfor 1 Year

**100% Actual & Verified — Instant Download, Please Click**
