Microsoft Exam Questions 70-532
Developing Microsoft Azure Solutions
NEW QUESTION 1
You are deploying the web-based solution in the West Europe region.
You need to copy the repository of existing works that the plagiarism detection service uses. You must achieve this goal by using the least amount of time.
What should you do?
A. Copy the files from the source file share to a local hard disk
B. Ship the hard disk to the West Europe data center by using the Azure Import/Export service.
C. Create an Azure virtual network to connect to the West Europe region.
D. Then use Robocopy to copy the files from the current region to the West Europe region.
E. Provide access to the blobs by using the Microsoft Azure Content Delivery (CDN). Modify the plagiarism detection service so that the files from the repository are loaded from the CDN.
F. Use the Asynchronous Blob Copy API to copy the blobs from the source storage account to a storage account in the West Europe region.

Answer: D

Explanation:
Ref: http://blogs.msdn.com/b/windowsazurestorage/archive/2012/06/12/introducing-asynchronous-cross-account-copy-blob.aspx

NEW QUESTION 2
You update the portion of the website that contains biographical information about students.
You need to provide data for testing the updates to the website. Which approach should you use?
A. Use SQL Server data
B. Use the Active Geo-Replication feature of Azure SQL Database.
C. Use SQL Replication.
D. Use the Geo-Replication feature of Azure Storage.

Answer: A

NEW QUESTION 3
You need to implement tracing for the website after the website is deployed.
Which code segment should you insert at line CF13?

A. Option A
B. Option B
C. Option C
D. Option D

Answer: C

NEW QUESTION 4
DRAG DROP
You need to insert markup at line SD22 to install the software that generates PDF documents.
How should you complete the relevant markup? To answer, drag the appropriate code segments to the correct locations. Each code segment may be used once, more than once, not at all. You may need to drag the split bar between panes or scroll to view content.
NEW QUESTION 5

DRAG DROP

You need to insert code at line SB17 to create the hyperlink that customers use to upload additional necessary documents. How should you complete the relevant code? To answer, drag the appropriate code segments to the correct locations. Each code segment may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

A. Mastered
B. Not Mastered

Answer: A

Explanation:
NEW QUESTION 6
You need to add a routing constraint.
Which code segment should you add at line PC29?

A. [HttpDelete]
B. [HttpPost]
C. [HttpOptions]
D. [HttpsHead]

Answer: B

NEW QUESTION 7
HOTSPOT
You need to configure monitoring.
For each event, which properly should you use?

A. Mastered
B. Not Mastered

Answer: A

Explanation:
NEW QUESTION 8
HOTSPOT
A company creates an Azure worker role to manage products.
The number of customers who inquire about how many products are in inventory rapidly increases.
You need to ensure that the worker role can scale to accommodate the increased workload. How should you complete the relevant code? To answer, select the appropriate option or options in the answer area.

A. Mastered
B. Not Mastered

Answer: A

Explanation:

NEW QUESTION 9
You plan to deploy an application as a cloud service. The application uses a virtual network to extend your on-premises network into Azure.
You need to configure a site-to-site VPN for cross-premises network connections.
Which two objects should you configure? Each correct answer presents part of the solution.

A. Dynamic routing gateway
B. VPN gateway
C. External-facing IPv6 address
D. External-facing IPv4 address
NEW QUESTION 10
HOTSPOT
You have a WebJob object that runs as part of an Azure website. The WebJob object uses features from the Azure SDK for .NET. You use a well-formed but invalid storage key to create the storage account that you pass into the UploadDataToAzureStorage method. The WebJob object the following code segment. Line numbers are included for reference only.

```
01 void UploadDataToAzureStorage(CloudStorageAccount storageAccount,
   string storageContainerName, string blobpath, string localpath)
02 {
03     var blobClient = storageAccount.CreateCloudBlobClient();
04     var container = blobClient.GetContainerReference(storageContainerName);
05     CloudBlockBlob blockBlob = container.GetBlockBlobReference(blobpath);
06     blockBlob.UploadFromFile(localpath, FileMode.Open);
07 }
```

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

A. Mastered
B. Not Mastered

Answer: A

Explanation:

NEW QUESTION 11
DRAG DROP
Your team uses a proprietary source control product. You use FTP to manually deploy an Azure Web App. You must move your source code from the proprietary source control product to a secure on-premises Git versioning system. Instead of deploying the website by using FTP, the website must automatically deploy to Azure each time developers check-in source files. You need to implement the new deployment strategy.

Which three actions should you perform in sequence? answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.
A. Mastered
B. Not Mastered

Answer: A

Explanation:

https://docs.microsoft.com/en-us/aspnet/core/publishing/azure-continuous-deployment

NEW QUESTION 12
Which of the following describes what is meant by the ITIL Service Strategy component?

A. Defining processes required to manage the solution.
B. Designing the solution to the ITIL specifications.
C. Ensuring changes are designed to meet customer expectations.
D. Understanding the intended customer and what services are required.

Answer: D

Explanation:
The objective of ITIL Service Strategy is to decide on a strategy to serve customers. Starting from an assessment of customer needs and the market place, the Service Strategy lifecycle stage determines which services the IT organization is to offer and what capabilities need to be developed. Its ultimate goal is to make the IT organization think and act in a strategic manner.

NEW QUESTION 13
HOTSPOT
You are administering an Azure environment for your company that requires multiple virtual machines (VMs) for a production application. You have the following requirements:
*Two VMs are required for application data.
*Seven VMs are required for image processing.
*VM sizes should be set to Standard D2.
*Only two image processing servers can be rebooted at a time.
You need to configure an availability set for the image processing VMs. You many fault domains and update domains should you implement? To answer, configure the appropriate options in the dialog box in the answer area.
NOTE: Each correct selection is worth one point.
A. Mastered
B. Not Mastered

Answer: A

Explanation:
References:
https://docs.microsoft.com/en-us/azure/virtual-machines/windows/manage-availability

NEW QUESTION 14
Which statement is true of Storage Analytics Metrics?
A. Capacity metrics are recorded only for blobs.
B. You can set hourly or by minute metrics through the management portal.
C. By default, metrics are retained for one year.
D. If you disable metrics, existing metrics are deleted from storage.

Answer: A

NEW QUESTION 15
Which statements are true of Storage Analytics Logging? (Choose Two.)
A. Logs are stored in the same storage account where they are enabled and are measured as part of your storage quota.
B. Logs can have duplicate entries.
C. Logs cannot be deleted.
D. You can all read, write, and delete requests to blobs, queues, and tables in a storage account.

Answer: BD

NEW QUESTION 16
Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.
After you answer a question in this sections, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.
You develop an enterprise application that will be used only by the employees of a company. The application is not Internet-facing. You deploy instances of the application to Azure datacenters on two continents.
You must implement a load balancing solution that meets the following requirements:
? Provide network-level distribution of traffic across all instances of the application.
? Provide HTTP and HTTPS protocols.
? Manage all inbound and outbound connections.
Any back-end virtual machine (VM) must be able to service requests from the same user or client session.
Solution: You implement Traffic Manager.
Does the solution meet the goal?
A. Yes
B. No

Answer: B

Explanation:
A Traffic Manager works at the DNS level. It uses DNS responses to direct end-user traffic to globally distributed endpoints. Clients then connect to those endpoints directly.
An application manager, which works at the Application level (Layer 7), is also required. References: https://docs.microsoft.com/en-us/azure/application-gateway/application-gateway- introduction

NEW QUESTION 17

Guaranteed success with Our exam guides
visit - https://www.certshared.com
You are designing a Windows Azure application. The application includes a web role and a worker role that communicate by using a Windows Azure Queue. The worker role processes each message within 10 seconds of retrieving it from the queue. The worker role must process each message exactly one time. If a process does not complete, the worker role must reprocess the message.

You need to recommend an approach for the worker role to manage messages in the queue. What should you recommend?

A. Process the message and then delete it from the queue.
B. Delete the message from the queue when retrieving the message.
C. Set the visibility timeout of the message to 1 when the message.
D. Process the message and then set the visibility timeout of the message to the maximum value.

Answer: A

NEW QUESTION 18
You are planning an upgrade strategy for a Windows Azure application. You need to identify changes that will require application downtime. Which change will always require downtime?

A. Changing the virtual machine size
B. Adding an HTTPS endpoint to a web role
C. Changing the value of a configuration setting
D. Upgrading the hosted service by deploying a new package

Answer: B

NEW QUESTION 19
You maintain an application that runs in Azure. You instrument the application using Application Insights. Some users report that the response time for page loads is high, but only during busy times. The reports started in the last week. Initial investigation reveals no significant difference in average response times throughout the day.

You need to determine time periods when response time may be high. How should you complete the query? To answer, drag the appropriate query segments to the correct locations. Each query segment may be used once, more than once or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Answer: A

Explanation:
References: https://github.com/MicrosoftDocs/azure-docs/blob/master/articles/application-insights/app-insights-analytics-tour.md

NEW QUESTION 20
You are developing a web service that runs on an Azure cloud service. You plan to use Application Insights to monitor the service.

You need to monitor telemetry for specific features in the service. Which two actions should you perform? Each correct answer presents part of the solution. NOTE: Each correct selection is worth one point.

A. Install the Application Insights for Worker Roles NuGet package.
B. Configure the data that you would like to send.
C. Install the Application Insights for Web NuGet package.
D. Enable Azure Diagnostics data.

Answer: AD

Explanation:
You can implement an Azure worker role that emits telemetry data using the .NET EventSource class. Azure Diagnostics is then used to collect the telemetry data and store it in an Azure storage account.

Thank You for Trying Our Product

We offer two products:

1st - We have Practice Tests Software with Actual Exam Questions
2nd - Questions and Answers in PDF Format

70-532 Practice Exam Features:

* 70-532 Questions and Answers Updated Frequently
* 70-532 Practice Questions Verified by Expert Senior Certified Staff
* 70-532 Most Realistic Questions that Guarantee you a Pass on Your First Try
* 70-532 Practice Test Questions in Multiple Choice Formats and Updates for 1 Year

100% Actual & Verified — Instant Download, Please Click Order The 70-532 Practice Test Here
