Microsoft

Exam Questions 70-688

Managing and Maintaining Windows 8.1
1. You are a systems administrator for your company. The company has employees who work remotely by using a virtual private network (VPN) connection from their computers, which run Windows 8 Pro. These employees use an application to access the company intranet database servers. The company recently decided to distribute the latest version of the application through using a public cloud.

Some users report that every time they try to download the application by using Internet Explorer, they receive a warning message that indicates the application could harm their computer.

You need to recommend a solution that prevents this warning message from appearing, without compromising the security protection of the computers.

What should you do?

A. Publish the application through a public file transfer protocol (FTP) site.
B. Digitally sign the application by using a trusted certificate, and then update the default App Package Deployment policy on all computers.
C. Change the default Software Restriction Policies on the client computers.
D. Change the default Applications Control Policies on the client computers.

Answer: B

2. HOTSPOT

Your network contains an Active Directory domain. All client computers run Windows 8 Enterprise and are located in an organizational unit (OU) named Windows8Computers.

The network has Windows Server update Services (WSUS) installed. All of the computers are configured to receive updates from WSUS.

The network administrator creates a new computer group named Win8Computers in WSUS.

You need to ensure that the Windows 8 computers receive all of the updates that are assigned to the Win8Computers computer group.

Which Group Policy setting should you configure? (To answer, select the appropriate setting in the answer area.)

![Group Policy Management Editor](image)

Answer:
3. You manage client computers that run Windows 8 and are part of a workgroup. These computers are configured to use Microsoft Update. Updates are downloaded every day at 10:00 and installed automatically.

Users report that their computers sometimes reboot without any interaction.

You need to prevent unplanned automatic reboots of the computers.

What should you do?

A. Enable the Reschedule Automatic Updates scheduled installations policy setting.
B. Disable the Re-prompt for restart with scheduled installations policy setting.
C. Enable the Automatic Updates detection frequency policy setting.
D. Enable the No auto-restart with logged on users for scheduled automatic updates installations policy setting.

Answer: D

4. HOTSPOT

You are a senior desktop administrator for Contoso, Ltd.

You receive a service desk ticket that requires you to resolve a computer's performance problems. The ticket included the following description of a performance problem:

"My computer slows down throughout the day. It does not occur consistently, but it does happen every day. The computer becomes slow. I have to reboot the computer before I can start working again, sometimes powering off by hand."

You verify that there are no driver issues in device manager, or unauthorized software on the computer. You also verify that there is not defragmentation on the hard drive as well.

You install the Windows Performance Toolkit (WPT) and configure Windows Performance Recorder (WPR) as shown in the following exhibit
The results of the Windows Performance Recorder are shown in the following exhibit.

![Windows Performance Recorder](image)

What should you conclude, based on these exhibits? (For each of the following statements, select Yes if the statement is true. Select No if the statement is not true. Each correct selection is worth one point.)

**Answer Area**

<table>
<thead>
<tr>
<th>Yes</th>
<th>No</th>
</tr>
</thead>
<tbody>
<tr>
<td>Detailed trace data will be captured for troubleshooting.</td>
<td></td>
</tr>
<tr>
<td>The Windows Performance Recorder will save the contents of the capture to a file.</td>
<td></td>
</tr>
<tr>
<td>The iexplore.exe file contributed to greater than 25% of the CPU</td>
<td></td>
</tr>
</tbody>
</table>

**Answer:**
5. You have Windows 8.1 Enterprise tablet computers.
   
   On a computer named Computed, you have a Wi-Fi connection named Access1.
   
   When you connect to Access1 you discover the following behaviors:
   
   New device software is not installed automatically.
   
   Video streamed from the Internet is in low resolution by default.
   
   Only critical updates are downloaded automatically in the background.
   
   Many Windows Store apps do not perform background network activities. When you connect to your company's LAN, you do not experience the same behaviors.
   
   You need to ensure that when you connect to Access1, you have the same user experience as when you connect to the LAN.
   
   What should you do?
   
   A. Configure Access1 to not allow sharing.
   B. From the PC settings page, enable the Download over metered connections option.
   C. Configure Access1 as a non-metered connection.
   D. From the PC settings page, modify the Wireless devices settings.
   
   Answer: B

6. Your network contains a web server named testweb.contoso.com that is used for testing.
   
   You have a Windows 8.1 Pro laptop.
   
   After a network administrator changes the IP address of the web server, you discover that you can no longer connect to testweb.contoso.com.
   
   You need to resolve immediately the issue that prevents you from connecting to the server.
   
   Which command line tool should you run?
   
   A. Clear-DnsClientCache
   B. Set-DnsClientGlobalSetting
   C. Set-DnsClient
   D. Nbtstat
   
   Answer: C

   
   For all 25 new tablets, you want to replace the existing Windows 8.1 Pro installation with Windows 8.1 Enterprise.
   
   You need to deploy the Windows 8.1 Enterprise image to all 25 tablets simultaneously by using the existing WDS infrastructure.
   
   What should you do?
A. Start the tablets in Windows Recovery mode.

B. Start the tablets by using a network boot option.

C. Start the tablets normally. Deploy the Windows Image (WIM) file located on a WDS network share.

D. Start the tablets normally. Map the Windows Image (WIM) file from a WDS network share.

Answer: B

8. You support computers that run Windows 8 Enterprise and are members of a workgroup.

Users are able to download and install any app from Windows Store.

You need to ensure that only approved apps can be installed from Windows Store.

What should you do?

A. Configure a Software Restriction Policy Certificate rule.

B. Enable Windows SmartScreen and select the Get administrator approval before running an unrecognized app from the Internet option.

C. Configure an AppLocker Packaged app rule.

D. Configure an AppLocker Publisher rule.

Answer: C

9. You have Windows 8.1 Pro client computers.

You need to recommend a solution to roll back the Windows Defender engine and the malware signature files on the computers. The solution must minimize administrative effort. What should you include in the recommendation?

A. the Mpcmdrun command

B. Windows 7 File Recovery

C. the Refresh your PC push-button reset feature

D. the Program and Features Control Panel item

Answer: D

10. HOTSPOT

You have a client computer named Computer1 that runs Windows 8 Enterprise. Computer1 is a member of the na.adatum.com domain.

You need to ensure that single-label names can be resolved from all three domains.

Which setting should you configure? (To answer, select the appropriate setting in the answer area.)
11. You have a desktop computer that runs Windows 8 Enterprise.
You add three new 3-terabyte disks.
You need to create a new 9-terabyte volume.

Which two actions should you perform? (Each correct answer presents part of the solution.
Choose two.)

A. From Disk Management, create a new spanned volume.
B. From Disk Management, convert all of the 3-terabyte disks to GPT.

C. From PowerShell, run the New-VirtualDisk cmdlet.

D. From Disk Management, bring all disks offline.

E. From Diskpart, run the Convert MBR command.

F. From PowerShell, run the Add-PhysicalDisk cmdlet.

Answer: A,B

12. You support laptops that run Windows 8 Pro and are members of an Active Directory domain. The domain is configured with user folder redirection by using a Group Policy Object (GPO). Loopback group policies are not used. Your company has decided to deploy tablets to all managers, for use as secondary computers. Tablets will be added to the domain.

You need to ensure that the folder redirection settings are applied only to laptops. What should you do?

A. Apply one GPO to the managers’ laptops and another GPO to the tablets.

B. Assign the msDS-Primary Computer attribute for the managers’ user domain accounts.

C. Assign the msDS-Primary Computer attribute for the computer domain accounts on the managers’ laptops.

D. Block the managers’ tablets from receiving the GPO.

Answer: B

13. DRAG DROP

You support computers that run Windows 8 Enterprise. AppLocker policies are deployed. Company policy states that AppLocker must be disabled. You need to disable AppLocker.

Which three actions should you perform in sequence? (To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.)

Answer:
14. You are a Windows 8 user. Your organization has purchased an Office 365 subscription.
You install Microsoft Lync and Microsoft Outlook on your computer.
You need to connect Office 365 to Lync and Outlook.
What should you do?
A. Run the Office Professional Plus setup from the Office 365 portal.
B. Run the Windows Mail application. Add a new account by using your Office 365 credentials.
C. Run the People application. Add a new account by using your Office 365 credentials.
D. Run the Office 365 desktop setup from the Office 365 portal.
Answer: D

15. At work, you use a desktop computer that runs Windows 8 Pro. At home, you use a laptop that runs Windows 8. You use the same Microsoft account to log on to both computers.
You want to use the same settings for both computers.
You need to ensure that all computer settings, including stored passwords, are synced between the computers.
What should you do?
A. Add both computers to the same Active Directory domain.
B. Use the same local accounts for both computers.
C. Install SkyDrive for Windows on both computers.
D. Designate both computers as trusted PCs.
Answer: D
Thank You for Trying Our Product

We offer two products:

1st - We have Practice Tests Software with Actual Exam Questions

2nd - Questions and Answers in PDF Format

70-688 Practice Exam Features:

* 70-688 Questions and Answers Updated Frequently
* 70-688 Practice Questions Verified by Expert Senior Certified Staff
* 70-688 Most Realistic Questions that Guarantee you a Pass on Your First Try
* 70-688 Practice Test Questions in Multiple Choice Formats and Updates for 1 Year

100% Actual & Verified — Instant Download, Please Click
