Exam Questions 70-695
Deploying Windows Devices and Enterprise Apps
NEW QUESTION 1
HOTSPOT - (Topic 1)
You need to identify the storage location and the file name of the automation scripts for the kiosk computers.
What should you identify? To answer, select the appropriate storage location and file name in the answer area.

Answer Area

Storage location:  

File name:  

A. Mastered
B. Not Mastered

Answer: A

Explanation:

A. Mastered
B. Not Mastered

NEW QUESTION 2
DRAG DROP - (Topic 2)
You need to meet the technical requirements for Image1.wim.
Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.
NEW QUESTION 3
- (Topic 3)
You need to use Configuration Manager to deploy operating systems to the production network. The solution must meet the technical requirements. Which two actions should you perform? Each correct answer presents part of the solution.

A. Add an operating system image.
B. Run the Create Automatic Deployment Rule Wizard.
C. Add an operating system installer.
D. Run the Create Task Sequence Wizard.
E. Run the Schedule Updates Wizard.

Answer: AD
NEW QUESTION 4
- (Topic 3)
You need to identify which step must be included in all of the operating system deployment task sequences created on Server1. Which step should you identify?

A. Validate  
B. Set Task Sequence Variable.  
C. Gather  
D. Use MDT Package.

Answer: D

NEW QUESTION 5
DRAG DROP - (Topic 3)
You need to prepare Server2 to perform a Windows 8.1 readiness assessment of the production network computers. Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

A. Mastered  
B. Not Mastered

Answer: A

Explanation:

NEW QUESTION 6
- (Topic 4)
You need to recommend a method to deploy the images to the new client computers in the Paris office. What should you include in the recommendation?

A. a Configuration Manager secondary site  
B. a Windows Deployment Services (WDS) server  
C. a Windows To Go installation  
D. a cloud distribution point

Answer: B
NEW QUESTION 7
- (Topic 4)
You need to recommend a solution to generate a report for the client computers in the Paris office. What should you include in the recommendation?

A. Deploy the Configuration Manager client.
B. Install and configure the Microsoft Deployment Toolkit (MDT).
C. Install and configure the Microsoft Assessment and Planning (MAP) Toolkit.
D. Install and configure the Windows Assessment and Deployment Kit (Windows ADK).

Answer: C

NEW QUESTION 8
- (Topic 4)
You need to capture the SOE image. You deploy Windows 8.1 Enterprise and all of the required applications to a new client computer in the New York City office. What should you do next?

A. Run sysprep.exe /unattend:sysprep.xml.
B. Create a Windows Deployment Services (WDS) capture image.
C. Run sysprep.exe /oobe.
D. Create a Configuration Manager capture task sequence.

Answer: C

NEW QUESTION 9
DRAG DROP - (Topic 5)
Your company purchases 32-bit and 64-bit BIOS-based computers. You plan to deploy Windows 8.1 Enterprise to the new computers by using a Windows Deployment Services (WDS) server named WDS1. The company has several departments. The requirements of each department are described in the following table.

<table>
<thead>
<tr>
<th>Department</th>
<th>Requirement</th>
</tr>
</thead>
<tbody>
<tr>
<td>Sales</td>
<td>When working remotely, the users in the sales department will use DirectAccess to connect to network resources. The sales department users run 64-bit Microsoft Application Virtualization (App-V) applications.</td>
</tr>
<tr>
<td>IT</td>
<td>The users in the IT department will create Windows To Go drives manually that may be used on any client computer in the office.</td>
</tr>
<tr>
<td>Development</td>
<td>The client computer in the development department will have 16 GB of RAM, so that development department users can run multiple virtual machines locally. Administrators will sideload apps on the development department computers.</td>
</tr>
<tr>
<td>Warehouse</td>
<td>The users in the warehouse department will each use a 32-bit tablet device. Administrators must ensure a consistent Start screen experience for the warehouse department users.</td>
</tr>
</tbody>
</table>

You need to identify the minimum number of images that must be added to WDS1 to meet the department requirements. How many boot images and install images should you identify? To answer, drag the appropriate numbers to the correct images. Each number may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

A. Mastered
B. Not Mastered

Answer: A

Explanation:

NEW QUESTION 10
HOTSPOT - (Topic 5)
Your company has a Microsoft Office 365 subscription. From a network share, you plan to deploy Office 365 ProPlus to the client computers in a branch office by using the Office Deployment Tool. The share is located at \Server1\Office. Some of the users in the branch office are consultants who often work for extended periods in customer locations. All other users in the branch office work in the...
customer service department.

During testing, you discover that Internet traffic spikes excessively during the installation of updates. From the Office Deployment Tool, you create a configuration file named Config1.xml for the consultants and you create a configuration file named Config2.xml for the customer service department.

You need to ensure that the Office applications on all of the client computers are updated regularly. The solution must minimize the amount of Internet traffic, whenever possible. Which configuration file should you modify and which configuration element should you add to the configuration file? To answer, select the appropriate options in the answer area.

**Answer Area**

- Configuration file to modify:
  - Config1.xml
  - Config2.xml

- Configuration element to add:
  
  `<Updates Enabled="TRUE" />
  `<Display Level="None" AcceptEULA="TRUE" />
  `<Updates Enabled="TRUE" UpdatePath="\server1\office" />
  `<Updates Enabled="FALSE" UpdatePath="\server1\office" />

**A. Mastered**

**B. Not Mastered**

**Answer:** A

**Explanation:**

NEW QUESTION 11

- (Topic 5)

You have a Windows Deployment Services (WDS) server named WDS1. WDS1 is used to deploy an image of Windows 8.1 Pro named Image1 to the computers in a classroom. The computers are redeployed every day. WDS1 only contains one install image.

Every morning on each computer, a technician must press F12, and then choose Image1. You need to automate the process of deploying Image1 to the computers. Image1 must be...
deployed automatically to the computers when they are turned on.
Which two actions should you perform on WDS1? Each correct answer presents part of the solution.

A. Configure a Multicast Transmission.
B. Configure the Network settings.
C. Configure the Boot settings.
D. Configure the PXE Response settings.
E. Configure the Client settings.

Answer: CD

NEW QUESTION 12
- (Topic 5)
Your company has 1,000 users. Ten percent of the users work from home and connect to the corporate network by using a VPN connection. All of the users have client computers that run Windows 7 Enterprise.
You have a file server named FS1.
You plan to perform new installations of Windows 8.1 Enterprise on all of the client computers. You will preserve existing application data and user settings. The solution must minimize hard disk space usage and network traffic.
What is the best recommendation to achieve the goal? More than one answer choice may achieve the goal. Select the BEST answer.

A. For all of the computers, use a USB disk as a compressed migration store.
B. For all of the computers, use a hard-link migration store.
C. For the computers of the users who work from home, use a USB disk as a compressed migration store.
D. For all other computers, use FS1 as a compressed migration store.
E. For the computers of the users who work from home, use a hard-link migration store.
F. For all other computers, use FS1 as a compressed migration store.

Answer: B

NEW QUESTION 13
- (Topic 5)
You have five Microsoft System Center 2012 R2 Configuration Manager Servers. The servers are configured as shown in the following table.

<table>
<thead>
<tr>
<th>Server name</th>
<th>Location</th>
<th>Role</th>
</tr>
</thead>
<tbody>
<tr>
<td>Server1</td>
<td>Seattle</td>
<td>Primary site server</td>
</tr>
<tr>
<td>Server2</td>
<td>Montreal</td>
<td>Primary site server</td>
</tr>
<tr>
<td>Server3</td>
<td>Paris</td>
<td>Primary site server</td>
</tr>
<tr>
<td>Server4</td>
<td>New York City</td>
<td>Primary site server</td>
</tr>
<tr>
<td>Server5</td>
<td>Munich</td>
<td>Primary site server</td>
</tr>
</tbody>
</table>

You need to ensure that the servers in the Seattle, Montreal, and New York City sites contain the same application packages. The solution must minimize administrative effort. Which cmdlet should you run first?

A. New-CMBoundaryGroup
B. Add-CMDistributionPoint
C. New-CMDistributionPointGroup
D. Add-CMBoundaryToGroup

Answer: C

Explanation:

NEW QUESTION 14
HOTSPOT - (Topic 5)
You have a server named Server1 that runs Windows Server 2012 R2. Server1 is a Windows Deployment Services (WDS) server.
You add an x86 capture image named Image1 and an x64 capture image named Image2 to WDS on Server1.
The network contains the client computers configured as shown in the following table.
You need to identify which capture image can be used on each computer.
What should you identify? To answer, select the appropriate images for each computer in the answer area.

**Answer Area**

<table>
<thead>
<tr>
<th>Computer name</th>
<th>Can use Image1</th>
<th>Can use Image2</th>
</tr>
</thead>
<tbody>
<tr>
<td>Computer1</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Computer2</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Computer3</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Computer4</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

A. Mastered
B. Not Mastered

**Answer:** A

NEW QUESTION 15

- (Topic 5)
You have a Windows Deployment Services (WDS) server named Server1. You have an image of Windows 8.1 Enterprise that you deploy by using WDS. You need to add a video card driver to the image. Which cmdlet should you run?

A. Add-WDSDriverPackage
B. Add-WindowsPackage
C. Import-WdsDriverPackage
D. Add-Windows Driver

**Answer:** A

**Explanation:**

NEW QUESTION 16

- (Topic 5)
You have a Windows Deployment Services (WDS) server.
You have a custom install image of Windows 8.1 Enterprise named Image1. The image is in an image group named ImageGroup1 and is the only image in the group.
You need to ensure that only users who are the members of a security group named Admins can deploy Image1 by using PXE.
What should you use?

A. the Deny-WdsClient cmdlet and the RequestID parameter  
B. the Set-WdsClient cmdlet and the Group parameter  
C. the Set-WdsInstallImage cmdlet and the UserFilter parameter  
D. the Approve-WdsClient cmdlet and the RequestID parameter

Answer: C

Explanation:

NEW QUESTION 17
- (Topic 5)
In Sources.wim, you have a Windows 8.1 image named Image1.
You have an application named App1.exe. App1.exe is a self-contained application that does not require installation.
You mount Image1.
You need to add App1.exe to Image1. What should you run first?

A. Add-ProvisionedAppxPackage and the Path and FolderPath parameters  
B. imagex.exe and the Append and Config parameters  
C. dism.exe and the Image and AddPackage parameters  
D. Copy-Item and the Path and Destination parameters

Answer: D

NEW QUESTION 18
- (Topic 5)
You have a server named Server1 that runs Windows Server 2012 R2. Server1 has the Microsoft Deployment Toolkit (MDT) installed and a deployment share is created.
You need to add an application named App1.exe to the deployment share by using Windows PowerShell.
You plan to run the following command:

Import-MDTApplication -Path "D:\Applications" -Name "App1" -ApplicationSourcePath "\Server1\Source\App1" -DestinationFolder "App1"

Which cmdlet should you run before you run the Import-MDTApplication command?

A. Import-MDTPackage  
B. Update-MDTDeploymentShare  
C. Set-ExecutionPolicy  
D. New-PSDrive

Answer: D

NEW QUESTION 19
- (Topic 5)
You have a server named Server1 that runs Windows Server 2012 R2. Server1 is a Windows Deployment Services (WDS) server.
You add a boot image and an install image to Server1. You need to create a capture image.
Which tool should you use?

A. Windows System Image Manager (Windows SIM)  
B. the Windows PowerShell module for WDS  
C. Oscdimg  
D. the Windows Deployment Services console

Answer: D
