NEW QUESTION 1
You have an Active Directory domain named contoso.com that contains a deployment of Microsoft System Center 2012 Configuration Manager Service Pack 1 (SP1). You have a Microsoft Intune subscription that is synchronized to contoso.com by using the Microsoft Azure Active Directory Synchronization Tool (DirSync). You need to ensure that you can use Configuration Manager to manage the devices that are registered to your Microsoft Intune subscription.
Which two actions should you perform? Each correct answer presents a part of the solution.
A. In Microsoft Intune, create a new device enrollment manager account.
B. Install and configure Azure Active Directory Synchronization Services (AAD Sync.)
C. In Microsoft Intune, configure an Exchange Connector.
D. In Configuration Manager, configure the Microsoft Intune Connector role.
E. In Configuration Manager, create the Microsoft Intune subscription.
Answer: DE

Explanation: To allow Configuration Manager to manage mobile devices in the same context as other devices, it requires you to create a Windows Intune subscription and synchronize user accounts from Active Directory to Microsoft Online. To achieve that, you are required to complete the following tasks:

NEW QUESTION 2
You support desktop computers for a company named Fabrikam, Inc. The computers are members of the Active Directory domain named fabrikam.com. Fabrikam works with a supplier named Contoso, Ltd. Each company has a public key infrastructure (PKI), and no public certificate authorities (CAs) are used. Fabrikam employees regularly use a Contoso website that is hosted on a server in the contoso.com domain.
The website requires SSL and mutual authentication.
You need to configure the computers to allow Fabrikam users to access the Contoso website without any warning prompts. You also need to use the fewest certificates possible.
Which certificate or certificates should you use?

Answer:

Explanation:
A company has a main office located in Miami, and branch offices in Boston, Los Angeles and Portland. The Office Networks are configured as described in the following table.

<table>
<thead>
<tr>
<th>City</th>
<th>Network</th>
</tr>
</thead>
<tbody>
<tr>
<td>Boston</td>
<td>10.30.0.0/24</td>
</tr>
<tr>
<td>Los Angeles</td>
<td>10.40.0.0/24</td>
</tr>
<tr>
<td>Miami</td>
<td>10.10.0.0/16</td>
</tr>
<tr>
<td>Portland</td>
<td>10.20.0.0/16</td>
</tr>
</tbody>
</table>

A management computer in the main office, named COMPUTER1, runs windows 8 and several third-party management applications. You need to meet the following requirements:
* Ensure that only users in the Boston office can connect to COMPUTER1 by using http.
* Ensure that only users in the Los Angeles office can connect COMPUTER1 by using https.
* Ensure that only users in the Portland office can connect to COMPUTER1 by using FTP.

You are configuring access to COMPUTER1. How should you configure windows firewall?

**Answer:**

**Explanation:**

* First Row: 10.20.0.0/16, 21, TCP
  The Portland users, on network 10.20.0.0/16, need FTP, which uses TCP port 21.
* Second Row: 10.30.0.0/16, 80, TCP
  The Boston users, on network 10.30.0.0/16, need HTTP, which uses TCP port 80.
* Third row: 10.40.0.0/16, 443, TCP
  The Los Angeles users, on network 10.40.0.0/16, need HTTPS, which uses TCP port 443.

**NEW QUESTION 4**
You have a Windows 8 computer. You need to migrate from Windows 8 to Windows 10 while retaining as much data as possible. You load the Windows 10 media into the DVD drive.

Which three actions should you perform next in sequence?

<table>
<thead>
<tr>
<th>Actions</th>
<th>Answers</th>
</tr>
</thead>
<tbody>
<tr>
<td>Under installation options, choose Keep personal files.</td>
<td></td>
</tr>
<tr>
<td>Run the Setup.exe file from the DVD.</td>
<td></td>
</tr>
<tr>
<td>Enter the license key.</td>
<td></td>
</tr>
<tr>
<td>Under installation options, choose Windows settings.</td>
<td></td>
</tr>
</tbody>
</table>

**Answer:**

**Explanation:**
Box 1: Run the Setup.exe file from the DVD.
Launch setup.exe on the DVD drive to start the upgrade process. Box 2: Enter the license key.
You will be prompted for the license key.
Box 3: Under the installation, choose Keep personal files.

References: [http://www.laptopmag.com/articles/how-to-upgrade-windows-10](http://www.laptopmag.com/articles/how-to-upgrade-windows-10)
You need to enable hibernation on the computer. Which three steps should you perform in sequence?

<table>
<thead>
<tr>
<th>Actions</th>
<th>Answers</th>
</tr>
</thead>
<tbody>
<tr>
<td>Change the <strong>When I press the power button</strong> menu settings.</td>
<td></td>
</tr>
<tr>
<td>From the Charm Bar, open <strong>Change PC settings</strong>.</td>
<td></td>
</tr>
<tr>
<td>Select <strong>Don't require a password</strong></td>
<td></td>
</tr>
<tr>
<td>Select <strong>What the power button does</strong></td>
<td></td>
</tr>
</tbody>
</table>

**Answer:**

**Explanation:** Box 1: From the Charm Bar, open Change PC settings. The Settings options of the Charm bar let you quickly tweak your computer’s six major settings: WiFi/Network, Volume, Screen, Notifications, Power, and Keyboard/Language.
Box 2: Select What the power button does.
In Power options, select Choose what the power button does.

Box 3: Change the When I press the power button menu settings.
Now select the option that says “Change settings that are currently unavailable”.
This will provide you with the option to enable Hibernation. Check Show Hibernate option to enable and click Save Changes.

NEW QUESTION 6
DRAG DROP
You administer desktop computers that run Windows 8 Enterprise and are members of an Active Directory domain. A new security policy states that all traffic between computers in the research department must be encrypted and authenticated by using Kerberos V5. You need to configure the requested traffic authentication settings by using Windows Firewall with Advanced Settings. Which three actions should you perform in sequence?
Answer:

**Explanation:**

(Step 1) In the Windows Firewall with Advanced Security MMC snap-in, right-click Connection Security Rules, and then click New Rule.
(Step 2) On the Rule Type page, click Isolation, and then click Next. (The Kerberos option in step 4 below is available only when you specify an Isolation or Custom rule type.)

On the Requirements page, confirm that Request authentication for inbound and outbound connections selected, and then click Next.
(Step 3) On the Authentication Method page, click Computer and user (Kerberos V5), and then click Next.

On the Profile page, clear the Private and Public check boxes, and then click Next. On the Name page, type Request Inbound Request Outbound, and then click Finish.

**NEW QUESTION 7**

You are the network administrator for Contoso, Ltd. Many users have Windows 10 Enterprise laptops, and your IT department configures all of them to use BitLocker on all fixed drives.

Many users carry sensitive corporate data on their USB drives. You need to enable BitLocker for these USB drives.

Which key protector option should you use?

A. a smartcard  
B. a startup key  
C. TPM+PIN  
D. TPM+Password

**Answer:** D

**Explanation:** References: http://www.howtogeek.com/192894/how-to-set-up-bitlocker-encryption-on-windows/

**NEW QUESTION 8**

All client computers in a company’s network environment run Windows 10 Enterprise. A client computer has drives that are configured as shown in the following table:

<table>
<thead>
<tr>
<th>Drive</th>
<th>Location</th>
<th>Type</th>
</tr>
</thead>
<tbody>
<tr>
<td>C:</td>
<td>Internal</td>
<td>Dynamic</td>
</tr>
<tr>
<td>D:</td>
<td>Internal</td>
<td>Dynamic</td>
</tr>
<tr>
<td>E:</td>
<td>Internal</td>
<td>Optical</td>
</tr>
<tr>
<td>F:</td>
<td>External</td>
<td>Basic</td>
</tr>
<tr>
<td>Z:</td>
<td>Network</td>
<td>Mapped</td>
</tr>
</tbody>
</table>
You are choosing a backup destination for drive C. You have the following requirements:
- Ensure that the backup file is available if drive C: fails.
- Ensure that the backup file can be accessed by other computers on the network.
- Support the storage of multiple versions of system image backups. You need to select a backup destination that meets the requirements.

Which destination should you select?

A. drive D:
B. drive F:
C. drive E:
D. drive Z:

Answer: D

NEW QUESTION 9
HOTSPOT
You have an Active Directory domain. All of the client computers in the domain run Windows 10 Enterprise.
You need to configure the client computers to download updates from a Windows Server Update Service server.

Which two settings should you configure? To answer, select the appropriate settings in the answer area.

Answer:

Explanation: Configure Automatic Updates
Specify intranet Microsoft update service location

NEW QUESTION 10
DRAG DROP
You administer Windows 10 Enterprise tablets and virtual desktop computers that are joined to an Active Directory domain.
Your company provides virtual desktop computers to all users. Employees in the sales department also use tablets, sometimes connected to the company network and sometimes disconnected from the company network.
You want sales department employees to have the same personal data, whether they are using their virtual desktop or their tablets.
You need to configure the network environment to meet the requirements.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order. More than one order to answer choices may be correct. You will receive credit for any of the correct orders you select.
NEW QUESTION 11
You are the desktop administrator for a small company. The company modifies its policy for retaining company financial documents from six months to three years. You currently use File History, retaining files for six months and saving copies of files every 20 minutes. You need to adjust your current backup solution to accommodate the policy change. What should you do?

A. Set the Keep Saved Versions option in File History to Forever.
B. Set the backup solution to Recovery model.
C. Set the Save Copies of Files frequency to Daily.
D. Set the File History log file setting to Archive the log when full, do not overwrite events.

Answer: A

Explanation: You can select one, two years or forever; there is no option for three years. Therefore, the only option is to keep the files forever.

NEW QUESTION 12
The computers in your company's finance department run Windows XP Professional. These computers have multiple line of business (LOB) applications installed. You add a new Windows 10 Enterprise computer in the finance department. You discover that an application used by the finance department does not work on this computer.
You need to run the application on the new computer. What should you do first?

A. Install Client Hyper-V.
B. Run Refresh your PC.
C. Install Windows XP Mode.
D. Create a Windows To Go workspace.

Answer: A

NEW QUESTION 13
You support Windows 10 Enterprise tablets. The tablets have the Application Virtualization (App-V) client installed. Company policy requires that all published App-V applications be available to users only when they are connected to the company network.
You need to configure the tablets so that the company policy requirements are enforced. What should you do?

A. Configure mandatory profiles for tablet users.
B. Reset the App-V client FileSystem cache on the tablets.
C. Disable the Disconnected operation mode on the tablets.
D. Change user permissions to the App-V applications.

Answer: C
NEW QUESTION 14
HOTSPOT
You are a consultant at a small company. The company’s employees use Windows 10 Enterprise computers. An employee wants to share his printer with only selected users. You need to enable the correct settings. Which two tab settings should you modify? To answer, select the appropriate tab settings in the answer area.

Answer:

Explanation:

NEW QUESTION 15
You have a computer that runs Windows 10. The computer is a member of an Active Directory domain. You need to enable Network Discovery on the computer. Which option should you select from the Network and Sharing Center?

A. Change adapter settings
B. Change advanced sharing settings
C. Internet Options
D. Set up a new connection or network

Answer: B

NEW QUESTION 16
You manage a corporate network. All servers run Windows Server 2016. All servers and client devices are joined to an Active Directory Domain Services (AD DS) domain named adatum.com.
The use of VPN servers on the network is strictly prohibited. Users must be able to access the corporate network in addition to Work Folders when they work at home on Windows 10 devices. You install, configure, and publish the certificate revocation list (CRL) for an internal Active Directory Certificate Services (AD CS) server. You need to configure the environment to allow your users to register devices. Solution: You create a DNS CNAME record of enterpriseregistration.adatum.com. You deploy Active Directory Federation Services (AD FS) and point the DNS record to your AD FS server. You deploy a Web Application Proxy server for the clients to connect to establish Internet connectivity to the device registration connection. Does the solution meet the goal?
A. Yes
B. No

Answer: A

NEW QUESTION 17

Company has Windows 10 Enterprise client computers. The corporate network is configured for IPv4 and IPv6. You need to disable Media Sensing for IPv6 on the client computers without affecting IPv4 communications. What should you do on each client computer?

B. Run the Disable-NetAdapterBinding Windows PowerShell cmdlet.
D. Run the Disable-NetAdapter Windows PowerShell cmdlet.

Answer: C

NEW QUESTION 18

Drag Drop

A company has an Active Directory Domain Services (AD DS) domain. All client computers run Windows 8.1. The company has three departments named Accounting, Human Resources (HR), and Marketing. User account objects are stored in their respective departmental AD security groups and have full access to shared folders for each department.

A new company policy requires that the following access rules are in place:
- Users must have complete access only to their department’s shared folder.
- Accounting department users must be able to change files in the HR folder.
- HR department users must be able to change files in the Marketing folder.
- Marketing department users must be able to change files in the Accounting folder.

You need to comply with the company policy. Which permissions should you assign? (To answer, drag the appropriate security group or groups to the correct location or locations in the answer area. Security groups may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.)

Answer:

On NTFS volumes, you can set security permissions on files and folders. These permissions grant or deny access to the files and folders.

NEW QUESTION 19

You have a computer that runs Windows 8.0. You create a system image backup on the computer and then you upgrade to Windows 10 Enterprise.

You need to access a file from the backup. The solution must use the least amount of administrative effort. What should you do?

A. From the Backup section of the Settings app, add a drive.
B. From the File History section of the Settings app, add a drive.
C. From the Computer Management console, attach a VHD.

Answer: C

Visit: https://www.certshared.com
D. From the File History control panel item, restore the personal files.

Answer: C

Explanation: References: https://www.techrepublic.com/article/how-to-access-a-system-image-and-restores-individual-files-using-windows-10s-native-vhd-support/

NEW QUESTION 20
You manage a branch office of a company named Contoso.
The branch office contains 20 computers that run Windows 10 Enterprise.
The main office of Contoso hosts a Win Server Update Service server (WSUS). Branch office computers are configured to download updates from the Internet.
You need to prevent computers in the branch office from sharing updates with other computers.
What should you do?

A. Modify the branch cache hosted mode settings
B. Modify branch cache distributed cache mode settings
C. Modify the Chose how updates are delivered settings
D. Deploy a downstream WSUS server to the branch office

Answer: C
