Microsoft

Exam Questions 70-703
Administering Microsoft System Center Configuration Manager and Cloud Services Integration
NEW QUESTION 1
You configure a task sequence in System Center Configuration Manager.
You need to ensure that the support department can see the progress of the task sequence only. What should you do?

A. Assign the db_datareader role to the users in the support department.
B. Create a monitoring query based on a task sequence.
C. Create a status message query.
D. Create a monitoring query that is limited to a collection.

Answer: C

Explanation: References:

NEW QUESTION 2
You have a deployment of System Center Configuration Manager (Current Branch). You configure hybrid mobile device management (MDM). You use Configuration Manager to manage Apple iOS and Android devices. You need to prevent users of the devices from incurring roaming data charges. What should you configure for each device? To answer, drag the appropriate configurations to the correct devices. Each configuration may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

Answer: [Select configurations]

Explanation: References:
https://docs.microsoft.com/en-us/sccm/mdm/deploy-use/create-configuration-items-for-android-and-samsung-kn
https://docs.microsoft.com/en-us/sccm/mdm/deploy-use/create-configuration-items-for-ios-and-mac-os-x-device

NEW QUESTION 3
Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution. After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.
You deploy the first primary site server to your organization. Discovery is not configured. You need to deploy the Configuration Manager client to five client computers in a workgroup. Solution: You deploy the client by using a software deployment. Does this meet the goal?

A. Yes
B. No

Answer: B

Explanation: References: https://docs.microsoft.com/en-us/sccm/core/clients/deploy/deploy-clients-to-windows-computers

NEW QUESTION 4
You deploy System Center Configuration Manager (Current Branch). You have client computers that run either Windows 7 or Windows 10. You need to deploy the Configuration Manager client to meet the following requirements:
- Install the client on the Windows 7 computers the next time the computers restart.
How should you deploy each client? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Guaranteed success with Our exam guides visit - https://www.certshared.com
NEW QUESTION 5
You deploy System Center Configuration Manager (Current Branch).
You need to manage the malware settings for Configuration Manager clients. What should you do first?

A. Add an Endpoint Protection point.
B. Disable Windows Defender.
C. Create a configuration baseline.
D. Create a compliance policy.

Answer: A

Explanation: References: https://docs.microsoft.com/en-us/sccm/protect/deploy-use/endpoint-protection-configure

NEW QUESTION 6
Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.
After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.
Your company uses a network ID of 10.0.0.0/8. The company opens a new office that uses a network ID of 10.5.0.0/16. The office has three floors. Each floor has a VLAN. The network ID of each VLAN is 10.5.10.0/24, 10.5.20.0/24, and 10.5.30.0/24.
You create a distribution point for the new office.
You need to ensure that the clients in the new office obtain content from the new distribution point. Solution: Create an Active Directory site associated to the 10.5.0.0/16 subnet, and then create an Active Directory site boundary. Does this meet the goal?

A. Yes
B. No

Answer: B

NEW QUESTION 7
You have a deployment of System Center Configuration Manager (Current Branch) that was implemented by a user named Admin1. Configuration Manager includes the administrative users shown in the following table.
You add a boot image named Boot1 to Configuration Manager. You set the security scope of Boot1 to Scope1. Which user can create a task sequence that uses Boot1?

A. User8
B. User1
C. User3
D. User6

Answer: C

NEW QUESTION 8
You have a deployment of System Center Configuration Manager (Current Branch). All client computers run Windows 7 and have the most recent updates installed. Configuration Manager and Microsoft Operations Manager Suite (OMS) are integrated.

You plan to use Upgrade Readiness to identify which computers support Windows 10. You need to ensure that the computers report data to OMS. Which two actions should you perform? Each correct answer presents part of solution. NOTE: Each correct selection is worth one point.

A. From Client Settings, configure a commercial ID key.
B. Configure Asset Intelligence.
C. From Client Settings, configure Windows telemetry.
D. Configure a software inventory.
E. Configure a hardware inventory.

Answer: AC

Explanation: References: https://docs.microsoft.com/en-us/sccm/core/clients/manage/upgrade/upgrade-analytics
https://docs.microsoft.com/en-us/sccm/core/clients/manage/monitor-windows-analytics

NEW QUESTION 9
You upgrade a Configuration Manager site by using Updates and Servicing. You do not upgrade the Configuration Manager client.

You need to pilot the upgrade of the Configuration Manager client on 10 percent of the computers. What should you do?

A. Create a collection that contains the pilot client
B. From the Hierarchy Settings Properties, configure the Client Upgrade setting
C. Modify the setting for the production client.
D. Create a collection that contains the pilot client
E. From the Hierarchy Settings Properties, configure the Client Upgrade setting
F. Modify the setting for the pre-production client.
G. In the Site Maintenance settings, modify the Clear Install Flag maintenance task.
H. From the Hierarchy Settings Properties, configure the Client Upgrade setting
I. Modify the settings for the production client.
J. Create an Active Directory security group that contains the pilot client
K. In the Site Maintenance settings, modify the Update Application Available Targeting maintenance task.

Answer: B

Explanation: References: https://docs.microsoft.com/en-us/sccm/core/clients/manage/upgrade/test-client-upgrades

NEW QUESTION 10
You have a deployment of System Center Configuration Manager (Current Branch).

You need to create a list of client computers that lack the system resources required to upgrade Microsoft Office.

Which two actions should you perform? Each correct answer presents part of the solution. NOTE: Each correct selection is worth one point.

A. Enable Asset Intelligence hardware inventory reporting classes.
B. Configure auditing for the resource attributes on files.
C. Add an Asset Intelligence synchronization point.

Answer: AC

Explanation: References: https://docs.microsoft.com/en-us/sccm/core/clients/manage/upgrade/upgrade-analytics
https://docs.microsoft.com/en-us/sccm/core/clients/manage/monitor-windows-analytics

https://docs.microsoft.com/en-us/sccm/core/clients/manage/asset-intelligence/configuring-asset-intelligence

NEW QUESTION 11
Your network contains an Active Directory forest named adatum.com.
A stand-alone primary System Center Configuration Manager (Current Branch) site named S01 is deployed to adatum.com.
The Configuration Manager deployment includes the servers shown in the following table.

<table>
<thead>
<tr>
<th>Server name</th>
<th>Configuration</th>
</tr>
</thead>
<tbody>
<tr>
<td>Server 1</td>
<td>Configuration Manager</td>
</tr>
<tr>
<td>Server 2</td>
<td>Microsoft SQL Server 2016 Service Pack 1 (SP1)</td>
</tr>
</tbody>
</table>

You perform regular site backups by using Configuration Manager.
You have a test environment that contains the servers shown in the following table.

<table>
<thead>
<tr>
<th>Server name</th>
<th>Configuration</th>
</tr>
</thead>
<tbody>
<tr>
<td>Server A</td>
<td>Member server</td>
</tr>
<tr>
<td>Server B</td>
<td>SQL Server 2016 SP1</td>
</tr>
</tbody>
</table>

The test environment has a domain controller that hosts a copy of the adatum.com forest. You plan to recover Configuration Manager in the test environment.
You need to prepare the test environment to support the planned recovery.

How should you complete each action? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Answer: 

NEW QUESTION 12
You have a deployment of System Center Configuration Manager (Current Branch) that has a management point and a distribution point.
You have 1,000 Configuration Manager clients that run Windows 10.
You open the Windows 10 Servicing dashboard and discover that no data appears. You need to ensure that servicing data is available on the dashboard.

What should you do?
A. Configure a software inventory.
B. Configure a hardware inventory.
C. Add a reporting services point and configure the report options.
D. Add a service connection point and a software update point.

Answer: D

Explanation: References: https://docs.microsoft.com/en-us/sccm/osd/deploy-use/manage-windows-as-a-service

NEW QUESTION 13
You have a deployment of System Center Configuration Manager (Current Branch).
The software updates available in Configuration Manager are shown in the following table.

<table>
<thead>
<tr>
<th>Update title</th>
<th>Product</th>
<th>Required</th>
</tr>
</thead>
<tbody>
<tr>
<td>Update for Windows 10 (KB3125217)</td>
<td>Windows 10 LTSB, Windows 10</td>
<td>3</td>
</tr>
<tr>
<td>Security Update for Adobe Flash Player for Windows 10 (KB4014329)</td>
<td>Windows 10 LTSB, Windows 10</td>
<td>5</td>
</tr>
<tr>
<td>Definition Update for Windows Defender - KB2267602 (Definition 1.239.999.0)</td>
<td>Windows Default</td>
<td>10</td>
</tr>
<tr>
<td>Update for Windows 10 (KB3173427)</td>
<td>Windows 10 LTSB, Windows 10</td>
<td>0</td>
</tr>
</tbody>
</table>

You create the automatic deployment rules (ADRs) as shown in the following table.

<table>
<thead>
<tr>
<th>ADR name</th>
<th>Software update search criteria</th>
<th>Deployment package to create</th>
</tr>
</thead>
<tbody>
<tr>
<td>ADR1</td>
<td>Required := 2 Title: Adobe</td>
<td>Package1</td>
</tr>
<tr>
<td>ADR2</td>
<td>Product: &quot;Windows 10&quot; Title: update</td>
<td>Package1</td>
</tr>
</tbody>
</table>

You ran ADR1 and ADR2. How many updates are in Package1 and Package2? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:
**NEW QUESTION 14**

Note: This question is part of a series of questions that use the same scenario. For your convenience, the scenario is repeated in each question. Each question presents a different goal and answer choices, but the text of the scenario is exactly the same in each question in this series.

Start of repeated scenario.

Your network contains an Active directory forest named adatum.com.

All client computers run Windows 10 Enterprise. All the computers are named by using the name of their respective department and an incremental three-digit number. For example, the first computer in the sales department is named Sales001.

Several managers use tablets that run Windows 10 and have 3 GB of RAM. All other client computers have at least 8 GB RAM.

Adatum.com is synchronized to Microsoft Azure Active Directory. Your company implements the Microsoft Store for Business.

You have a deployment of System Center Configuration Manager (Current Branch) that has discovery configured. All the client computers have the Configuration Manager client installed.

The company uses the applications shown in the following table.

<table>
<thead>
<tr>
<th>Application Name</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>App1</td>
<td>A Microsoft Application Virtualization (APP-V) virtual application</td>
</tr>
<tr>
<td>App2</td>
<td>An app that the company purchased from the Microsoft Store for Business and is licensed for offline use</td>
</tr>
<tr>
<td>App3</td>
<td>A 64-bit application that is deployed to all the client computers</td>
</tr>
<tr>
<td>SalesAppLite</td>
<td>An application used by users in the sales department on computers that have 3 GB of RAM or less</td>
</tr>
<tr>
<td>SalesAppFull</td>
<td>An application used by users in the sales department on computers that have more than 3 GB of RAM</td>
</tr>
</tbody>
</table>

The company identifies the following requirements for software deployments:

- View the Upgrade Readiness data of all the client computers.
- Deploy App1 to the client computers in the marketing department.
- Deploy App2 to the client computers in the human resources (HR) department.
- Monitor the usage of App3.
- Deploy SalesAppLite to sales department computers that have 3 GB of RAM or less.
- Deploy SalesAppFull to sales department computers that have more than 3 GB of RAM.

You create a cloud-based distribution point that has a public name of d1594d4527614a09b934d470. End of repeated scenario.

You need to create the DNS record in adatum.com for the cloud-based distribution point. What should you configure? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

**Answer Area**

- **Record type:**
  - Alias(CNAME)
  - Host (A or AAAA)
  - Host information (HINFO)
  - Service location (SRV)
  - Well known services (WKS)

- **Name to reference:**
  - d1594d4527614a09b934d470.azure.com
  - d1594d4527614a09b934d470.cloudapp.net
  - d1594d4527614a09b934d470.core.windows.net
  - d1594d4527614a09b934d470.manage.microsoft.com
  - d1594d4527614a09b934d470.onmicrosoft.com
