Exam Questions 70-703

Administering Microsoft System Center Configuration Manager and Cloud Services Integration
NEW QUESTION 1
Note: This question is part of a series of questions that use the same scenario. For your convenience, the scenario is repeated in each question. Each question presents a different goal and answer choices, but the text of the scenario is exactly the same in each question in this series.
Start of repeated scenario.
You work for a company named ADatum Corporation.
The ADatum network contains an Active Directory domain named adatum.com.
You have a partner company named Contoso, Ltd. The Contoso network contains an Active Directory domain named adatum.com.
All the client computers at both companies run Windows 10.
Each company has a deployment of System Center Configuration Manager (Current Branch). ADatum has sales and IT departments. ADatum has a collection for each department.
Contoso has research, marketing, and human resources (HR) departments. Contoso has a collection for each department.
ADatum purchases Contoso.
You configure on-premises mobile device management (MDM) in adatum.com. You enroll the client computers in the IT department into on-premises MDM.

You need to view a detailed hardware inventory of an IT department computer that is currently offline. Which tool should you use?
A. Resource Explorer
B. Device Manager
C. Microsoft Intune in the Microsoft Azure portal
D. the Microsoft Azure portal

Answer: A

Explanation:

NEW QUESTION 2
You have a deployment of System Center Configuration Manager (Current Branch). The domain contains the users shown in the following table.

<table>
<thead>
<tr>
<th>User name</th>
<th>Members of</th>
</tr>
</thead>
<tbody>
<tr>
<td>User1</td>
<td>Domain Users</td>
</tr>
<tr>
<td>User2</td>
<td>Help Desk Users</td>
</tr>
<tr>
<td>User3</td>
<td>Enterprise Admins</td>
</tr>
<tr>
<td>User4</td>
<td>Support Techs</td>
</tr>
</tbody>
</table>

Support Techs is a member of the Administrators group on each client computer. Help Desk Users is a member of the Power Users group on each client computer.

You need to deploy Configuration Manager agents by using a client push installation. The solution must use the principle of least privilege.
Which user should you configure as the client push installation account?
A. User1
B. User2
C. User3
D. User4

Answer: D

NEW QUESTION 3
Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.
Your company uses a network ID of 10.0.0.0/8.
The company opens a new office that uses a network ID of 10.5.0.0/16. The office has three floors. Each floor has a VLAN. The network ID of each VLAN is 10.5.10.0/24, 10.5.20.0/24, and 10.5.30.0/24.
You create a distribution point for the new office.
You plan to distribute content to clients in the new office from the new distribution point. You need to create a boundary for the new office.
Solution: Create an IP subnet boundary for 10.5.10.0/24, 10.5.20.0/24, and 10.5.30.0/24. Does this meet the goal?
A. Yes
B. No

Answer: B

NEW QUESTION 4
You have a deployment of System Center Configuration Manager (Current Branch) that was implemented by a user named Admin1. Configuration Manager includes the administrative users shown in the following table.
NEW QUESTION 5
You have a deployment of System Center Configuration Manager (Current Branch). Your company has a main office and a branch office. The branch office has five users. Some users use laptops and some use desktop computers. All the servers for the company are located in the main office. The branch office connects to the main office by using a VPN over a DSL connection to the main office.

You need to minimize the bandwidth used to deploy updates to branch office clients over the VPN connection. The solution must minimize costs.

A. a pull-distribution point
B. a cloud management gateway
C. BranchCache
D. a cloud-based distribution point

Answer: C

Explanation:
References: https://docs.microsoft.com/en-us/sccm/core/plan-design/hierarchy/design-a-hierarchy-of-sites

NEW QUESTION 6
Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a deployment of System Center Configuration Manager (Current Branch). You configure a cloud management gateway for Configuration Manager. You have a client computer that is currently on the corporate network.

You need to force the computer to get the location of the cloud management gateway immediately. Solution: You restart the Network Location Awareness service. Does this meet the goal?

A. Yes
B. No

Answer: B

NEW QUESTION 7
Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a deployment of System Center Configuration Manager (Current Branch). You configure hybrid mobile device management (MDM).

You have a support technician named User1. Your company purchases 300 Apple iPhones. You need to ensure that User1 can enroll the iPhones. Solution: From a web browser, you request an Enrollment Agent certificate from a certification authority (CA). Does this meet the goal?

A. Yes
B. No

Answer: B

Explanation:
NEW QUESTION 8
You upgrade a Configuration Manager site by using Updates and Servicing. You do not upgrade the Configuration Manager client. You need to pilot the upgrade of the Configuration Manager client on 10 percent of the computers. What should you do?

A. Create a collection that contains the pilot client
B. From the Hierarchy Settings Properties, configure the Client Upgrade setting
C. Modify the setting for the production client
D. Create a collection that contains the pilot client
E. From the Hierarchy Settings Properties, configure the Client Upgrade setting
F. Modify the setting for the pre-production client
G. In the Site Maintenance settings, modify the Clear Install Flag maintenance task
H. From the Hierarchy Settings Properties, configure the Client Upgrade setting
I. Modify the settings for the production client
J. Create an Active Directory security group that contains the pilot client
K. In the Site Maintenance settings, modify the Update Application Available Targeting maintenance task.

Answer: B

Explanation:
References: https://docs.microsoft.com/en-us/sccm/core/clients/manage/upgrade/test-client-upgrades

NEW QUESTION 9
You deploy System Center Configuration Manager (Current Branch) to manage desktop computers. On the reporting services point, you discover that the following reports are missing:
- Application Deployment – Historical
- List of Malware Detected – Historical
- General Software Inventory – Historical
- General Hardware Inventory – Historical
- Infrastructure Health Overview – Historical
- Software Distribution Summary – Historical
- Endpoint Protection and Software Update Compliance – Historical

You need to ensure that you can generate reports for long-term historical data. What should you do first?

A. Create report subscriptions.
B. Install Microsoft SQL Server Report Builder.
C. Modify the properties of the reporting services point.
D. Add a Data Warehouse service point.

Answer: D

Explanation:
References: https://docs.microsoft.com/en-us/sccm/core/servers/manage/data-warehouse

NEW QUESTION 10
You have a deployment of System Center Configuration Manager (Current Branch). Your company has offices in Paris and Boston. All client computers run Windows 7. You plan to migrate all the computers to Windows 10 by using task sequences in Configuration Manager. All the hard drives will be reformatted during the migration.

You need to meet the following requirements:
- For the computers in the Boston office, the user data and settings must be retained.
- For the computers in the Paris office, users must be able to select which applications to install.

What should you use in each office? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

A. Mastered
NEW QUESTION 11
You have offices in the United Kingdom and Sweden.
You have a deployment of System Center Configuration Manager that you use to manage the client computers in the offices.
All the managed computers run Windows 10. The computers in the United Kingdom office use the English (United Kingdom) en-GB language pack. The computers in the Sweden office use the Swedish (Sweden) sv-SE language pack.
You need to create a servicing plan for Windows 10 in Configuration Manager to update the computers to the latest version of Windows 10.
The solution must meet the following requirements:

A. Mastered
B. Not Mastered

Answer: A

Explanation:
References: https://docs.microsoft.com/en-us/windows/deployment/windows-10-deployment-scenarios

NEW QUESTION 12
You have a deployment of System Center Configuration Manager (Current Branch). You configure hybrid mobile device management (MDM).
Your company allows users to use their personal devices to access corporate data.
A user named User1 has a personal tablet that runs Windows 10. The tablet is enrolled in Microsoft Intune. User1 leaves the company.
You plan to perform a selective wipe of the tablet. What will be deleted from the tablet?

A. all the apps that are installed from the Microsoft Store for Business
B. all the files located in %ProgramData%\Package Cache
C. all the user profiles
D. all the files located in %USERPROFILE%\AppData\Roaming

Answer: A

Explanation:
References: https://docs.microsoft.com/en-us/sccm/mdm/deploy-use/wipe-lock-reset-devices

NEW QUESTION 13
You have a deployment of System Center Configuration Manager (Current Branch).
You need to collect detailed usage data from devices. The usage data must be retained for three years. What should you deploy?

A. A Microsoft Operations Management Suite (OMS) connector
B. Software update point switching
C. Server groups
D. A Data Warehouse service point.

Answer: D

NEW QUESTION 14
You deploy Microsoft Office 365 ProPlus by using Configuration Manager.
You need to use Configuration Manager to update Office 365 ProPlus as soon as possible.
Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.
A. Mastered
B. Not Mastered

Answer: A

Explanation:

NEW QUESTION 15
You have a deployment of System Center Configuration Manager (Current Branch) that was implemented by a user named Admin1. Configuration Manager includes the administrative users shown in the following table:

<table>
<thead>
<tr>
<th>User name</th>
<th>Security role</th>
<th>Security scope</th>
</tr>
</thead>
<tbody>
<tr>
<td>User1</td>
<td>Infrastructure Administrator</td>
<td>Default, Scope1</td>
</tr>
<tr>
<td>User2</td>
<td>Asset Manager</td>
<td>Scope1</td>
</tr>
<tr>
<td>User3</td>
<td>Full Administrator</td>
<td>Default</td>
</tr>
<tr>
<td>User4</td>
<td>Operating System Deployment Manager</td>
<td>Scope1</td>
</tr>
<tr>
<td>User5</td>
<td>Operating System Deployment Manager</td>
<td>Default</td>
</tr>
<tr>
<td>User6</td>
<td>Operations Administrator</td>
<td>Scope1</td>
</tr>
<tr>
<td>User7</td>
<td>Operations Administrator</td>
<td>Default</td>
</tr>
<tr>
<td>User8</td>
<td>Company Resource Access Manager</td>
<td>Default, Scope1</td>
</tr>
</tbody>
</table>

You add a boot image named Boot1 to Configuration Manager. You set the security scope of Boot1 to Scope1. Which user can create a task sequence that uses Boot1?

A. User4
B. User5
C. User7
D. User1

Answer: A

Explanation:

NEW QUESTION 16
Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Your company has client computers that run either the 32-bit version of Windows 8 or the 64-bit version of Windows 10. You need to install a line-of-business application to the computers. The 64-bit version of the application must be installed on the Windows 10 computers.

Solution: Create one application that has two deployment types. Configure a requirement for each deployment type.

Does this meet the goal?
NEW QUESTION 17
Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.
After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.
You have a deployment of System Center Configuration Manager (Current Branch). You configure a cloud management gateway for Configuration Manager. You have a client computer that is currently on the corporate network. You need to force the computer to get the location of the cloud management gateway immediately. Solution: You run the Get-cloudDistributionPoint cmdlet. Does this meet the goal?
A. Yes
B. No
Answer: B

NEW QUESTION 18
You have a deployment of System Center Configuration Manager (Current Branch). You plan to implement hybrid mobile device management (MDM). Which cloud service should you provision?
A. Microsoft Operations Manager Suite (OMS)
B. Microsoft Store for Business
C. Microsoft Intune
D. Microsoft Azure
Answer: C

NEW QUESTION 19
You have a deployment of System Center Configuration Manager (Current Branch). You manage client computer that run either Windows 7 or Windows 10. You plan to deploy two applications named App2 and App3. The deployment must meet the following requirements:
- App2 must replace a deployed application named App1.
- App3 must be installed only on client computers that have at least 8GB of RAM.
What should you configure for each application? To answer, drag the appropriate options to the correct applications. Each option may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.
NOTE: Each correct selection is worth one point.

A. Mastered
B. Not Mastered
Answer: A

Explanation:

visit - https://www.certshared.com
You work for a company named ADatum Corporation.
The ADatum network contains an Active Directory domain named adatum.com.
You have a partner company named Contoso, Ltd. The Contoso network contains an Active Directory domain named adatum.com.
All the client computers at both companies run Windows 10.
Each company has a deployment of System Center Configuration Manager (Current Branch). ADatum has sales and IT departments. ADatum has a collection for each department.
Contoso has research, marketing, and human resources (HR) departments. Contoso has a collection for each department.
ADatum purchases Contoso.
You configure on-premises mobile device management (MDM) in adatum.com. You enroll the client computers in the IT department into on-premises MDM.
You need to ensure that when the users at Contoso enroll into MDM, they accept the usage policy of Contoso. What should you do?

A. From Microsoft Intune in the Microsoft Azure portal, click Device compliance and configure the Compliance policy settings.
B. From the Configuration Manager console, open the Assets and Compliance workspace and configure the terms and conditions.
C. From Microsoft Intune in the Microsoft Azure portal, click Device enrollment and configure the terms and conditions.
D. From the Configuration manager console, open the Assets and Compliance workspace and configure a compliance policy.

Answer: B

Explanation:
