Exam Questions 74-344

Managing Programs and Projects with Project Server 2013

Version:Demo

1. You are a program manager in the Project Management Office (PMO) of an organization that uses Project Server 2013. The Enterprise Gantt Chart is visible to all project managers.

You plan to create a new project enterprise custom field to show information about schedule variance.

You need to include this new field in the Enterprise Gantt Chart in Project Professional 2013 so that all project managers of actual and future projects who use this view can see this field by default.

What should you do?

A. In Project Professional 2013, check-out the Enterprise Global template, modify the Enterprise Gantt Chart view by adding the new project enterprise custom field, and then update the view.

B. Create a Project Center view named Enterprise Gantt Chart with the new project enterprise custom field, and select the Gantt Chart Views format.

C. Modify the Project Information project details page by adding the new project enterprise custom field.

D. In Project Professional 2013, create a blank project, add a new view named Enterprise Gantt Chart, modify the view by adding the new project enterprise custom field, and then save the view. Save the project as a template.

Answer: A

2. You are a program manager for a company that uses Project Server 2013 and Project Professional 2013. You manage the implementation of a data warehouse.

You have set up your program master project with subprojects for each implementation area.

You need to make edits to the dependencies between projects.

What are two possible ways to achieve this goal? (Each correct answer presents a complete solution. Choose two.)

A. View the subproject in Project Web App (PWA) and choose Edit. Then add your dependencies in the predecessor's/successor's column.

B. Open the program-level project from Project Web App (PWA) by using Project Professional 2013. Highlight the tasks you wish to link for a dependency with the control key. Then click the link button on the tool bar.

C. Open the program-level project and the subproject from the Project Web App (PWA) and save them to your local machine. Then add your predecessor's/successor's column in either file.

D. Open each of the required subprojects from the Project Web App (PWA) by using Project Professional 2013 and create the link in the predecessor's/successor's column to the other projects using the <>\Project Name\Task ID.

E. View the program-level project in Project Web App (PWA) and choose Edit. Then add your dependencies in the predecessor's/ successor's column using the <>\Project Name\Task ID.

Answer: B,D

3. You are a project manager for an organization that uses Project Online.

You create a resource plan to provide high level resource demand during the portfolio intake and selection process. Your project is now selected for detailed planning. You complete a detailed work breakdown structure (WBS).

You need to remove the resource demand from the resource plan.

What should you do?

- A. Change the Calculate From setting on the resource plan.
- B. Go to Project Center and delete the resource plan.
- C. Inactivate the resource plan.
- D. Go to Server Settings and delete the resource plan.
- E. Set the Publish flag to No on the resource plan.

Answer: A

4. You are a project manager who has standard permissions, and your organization uses Project Server 2013.

Some of your resources consistently update their assignments correctly. You want to accept their future updates without review.

You need to begin accepting their updates without review by using the least amount of effort possible.

What should you do?

- A. Set up a rule in the Approval Center to automatically accept all updates, specifying the resources by name, for all projects.
- B. Set up a VBA macro to automatically accept all updates, specifying the resources by name, for all projects.
- C. Set up a Project Server 2013 workflow by using Microsoft SharePoint Designer to automatically accept all updates, specifying the resources by name, for all projects.
- D. Set up a timesheet event handler in the Project Server Settings to automatically accept all updates, specifying the resources by name, for all projects.

Answer: A

5. You are in the Project Management Office (PMO) for a company that uses Project Online to select portfolios for each business unit.

The parameters used as cost constraints vary from department to department, including Cost, CapEx, and Estimated Hours. You are responsible for providing the infrastructure to support the various constraints.

You need to select a feasible method for employing cost constraints.

Which two fields should you use? (Each correct answer presents part of the solution. Choose two.)

- A. Project Number
- B. Project Cost
- C. Project Text
- D. Project Duration

Answer: A,B

6. Your work in a multinational corporation which uses Project Server 2013 to plan and control projects in different business units. Each business unit has its own portfolio of projects but can participate in strategic projects. The Project Management Office (PMO) has configured Enterprise Project Types (EPTs) to create new products, launch marketing campaigns, and deploy new lines of business tools to comply with the governance processes.

One of your roles is to identify new products. A local team in Singapore produces an effective idea for a new product.

You need to create a business case for the next portfolio analysis. You need to gather general information about the new product by efficiently collaborating with the local team.

What should you do?

- A. Start a Project with the New Product EPT, which will trigger a workflow and allow you to display and collect descriptive data and exchange information in the Project site.
- B. Exchange information by sharing documents through SkyDrive Pro 2013.
- C. Create a Team Site for the Singapore business unit for gathering information and assigning tasks. Save the Team Site as a template for use within the New Product EPT.
- D. Start a new enterprise project with the Microsoft SharePoint task list EPT, and grant immediate access to the team so they can share information, assign tasks, and collaborate.

Answer: A

7. You are a timesheet manager for several team members. Your organization uses Project Server 2013.

You accept all timesheets for a timesheet period. One of your team members contacts you about a mistake they made on their timesheet. They ask you to let them change it.

You need to enable this team member to change their timesheet.

What should you do in Project Web App (PWA)?

- A. Go to the Tasks page and reject the timesheet tasks.
- B. Go to the Timesheet page, access the history of the timesheets, select the timesheet, and recall.
- C. Go to the Approvals page and reject the timesheet.
- D. Go to the Approvals page, access the history of the timesheets, select the timesheet, and recall.

Answer: D

8. You are a program manager in the Project Management Office (PMO) of an organization that is implementing Project Server 2013.

You plan to include five of your organization's departments in the first rollout of Project Server 2013.

You need to develop a project creation process that meets the following requirements:

Each department must have its own Project Site template.

Each department must have its own Project Schedule template.

The project creation process needs to be developed in the least amount of time.

What should you do?

- A. Create five projects, one for each department. Send the project file via email to the respective department leader. Instruct them to use the project file as a template every time they need to create a new project.
- B. Create five Microsoft SharePoint sites and five projects, one for each department. Publish the projects into the respective SharePoint site. Instruct the department leads to create a copy of their SharePoint site and to use the project file as a template each time they need to create a new project.
- C. For each department, create one enterprise project template (EPT), one Project Site template, and one project template. Associate the Project Site template and the project template with the EPT.
- D. Create a single Microsoft SharePoint site and one project for each department, and then publish the projects into the SharePoint site. Instruct the department leads to create a new sub-site from the SharePoint site and to use the appropriate project file as the template each time they need to create a new project.

Answer: C

9. You are a project manager in an organization that uses Project Server 2013. Single-entry mode is disabled. The Only allow task updates via Tasks and Timesheets option is enabled.

Project team members submit updates to tasks through Project Web App (PWA).

A team member submits a status update to you for approval. The team member later informs you that they made a typing mistake in the status update.

You need to correct the status update.

What should you do?

- A. Instruct the team member to enter the correct information and send the status again.
- B. Accept the status update in Project Professional 2013 and correct the user's mistake.
- C. Reject the status update in Project Professional 2013 and have the user send the correct status.
- D. Instruct the team member to recall the timesheet.

Answer: A

10. You are a project manager for an organization that uses Project Server 2013.

After performing a review of all the risks created by your project team for one of your projects, you realize that the risks are not linked to their related tasks.

You need to link the risks to their related tasks.

What should you do?

- A. Open each risk, select the Attach file option, and then select the name of the related task.
- B. Open your project in Project Web App (PWA). Highlight each task and use the Related Item option for linking one or more risks for each task.
- C. Create a new field for the Risk content type in SharePoint and name it "task name". Then open each risk and write the name of the related task into the new field.
- D. Open each risk and copy and paste its name into the Notes field in the task page.

Answer: B

Thank You for Trying Our Product

We offer two products:

1st - We have Practice Tests Software with Actual Exam Questions

2nd - Questions and Answers in PDF Format

74-344 Practice Exam Features:

- * 74-344 Questions and Answers Updated Frequently
- * 74-344 Practice Questions Verified by Expert Senior Certified Staff
- * 74-344 Most Realistic Questions that Guarantee you a Pass on Your First Try
- * 74-344 Practice Test Questions in Multiple Choice Formats and Updates for 1 Year

100% Actual & Verified — Instant Download, Please Click
