14. This question requires that you evaluate the underlined text to determine if it is correct.

You can export information to a text file by using the `msconfig` command from a command prompt.

Select the correct answer if the underlined text does not make the statement correct. Select "No change is needed" if the underlined text makes the statement correct.

- A. `msinfo32`
- B. `perfmon`
- C. `taskmgr`
- D. No change is needed

Answer: A

15. The owner of a bookstore asks you to help her set up a printer in exchange for a discount on purchases. She has three Windows 7 computers networked through a wireless router and connected through a HomeGroup. She also has a new USB printer and wants to be able to print from any of the three computers.

First, you install the printer on one of the three computers.

What should you do next to share this printer with the HomeGroup?

- A. Connect the printer directly to the network and share it with the HomeGroup.
- B. From Control Panel, select the HomeGroup feature. Make sure that the Printers checkbox is enabled.
- C. Connect to the printer over TCP/IP and then share it with the HomeGroup.
- D. Configure each computer's firewall to allow port 631 because HomeGroup's printer sharing feature uses the IPP protocol.

Answer: B

16. You are an intern for Tailspin Toys and are creating a slideshow that shows pictures of certain new products that your company is working on. You are accessing the network using a Windows 7 laptop, and the pictures are located on several different network shares.

You need to be able to perform a rich content search on all of the network shares at the same time.

What should you do?

- A. Enable file and printer sharing on the laptop.
- B. Copy all of the pictures to a folder on your laptop and search that folder.
- C. Add the network shares to your Pictures Library. Then perform a search on your Pictures Library.

D. Access the network shares via the Network link in Windows 7 Explorer. Then search each share individually.

Answer: C

17. HOTSPOT

You are working as a technical intern for Tailspin Toys. A product developer plans to attend a convention in France and wants to bring a company-owned Windows 7 Ultimate laptop. Your manager is concerned about the security of the information contained on the laptop and asks you to turn on BitLocker.

You receive the error message shown in the following image:

Use the drop-down menus to select the answer choice that completes each statement. Each correct selection is worth one point

Answer Area

You check [answer choice] on the system to see if a TPM was disabled.

If it is determined that the system does not have a TPM, you should use [answer choice] to allow you to enable BitLocker on the computer.

Answer Area

You check [answer choice] on the system to see if a TPM was disabled.

- System Bios
- Disk Management
- Devices and Printers

If it is determined that the system does not have a TPM, you should use [answer choice] to allow you to enable BitLocker on the computer.

- Local Security Policy
- Disk Management
- BitLocker Administration
