

Microsoft

Exam Questions 98-369

Cloud Fundamentals

Version:Demo

1. This question requires that you evaluate the underlined text to determine if it is correct.

You may restore a Microsoft Office 365 user account within 6 months of deleting the account.

Instructions: Review the underlined text. If it makes the statement correct, select "No change is needed". If the statement is incorrect, select the answer choice that makes the statement correct.

- A. No change is needed.
- B. 30 days
- C. 90 days
- D. 1 year

Answer: B

Explanation: The user's data is stored for 30 days. When you restore the work or school account within the 30 days, the user account and all associated data are restored.

2. This question requires that you evaluate the underlined text to determine if it is correct.

In Microsoft Intune, the tenant administrator's assigned "administrator role" determines which details that administrator can view and manage in the account portal.

Instructions: Review the underlined text. If it makes the statement correct, select "No change is needed". If the statement is incorrect, select the answer choice that makes the statement correct.

- A. No change is needed
- B. user management
- C. subscriptions
- D. services support

Answer: A

Explanation: Assigning admin roles Depending on the size of your organization, you may want to designate several admins who serve different functions. The admin has access to all features in the admin center, and can create or edit users, assign admin roles to others, reset user passwords, manage user licenses, and manage domains, among other things. Choose an admin role for an existing user, and then use this procedure to assign or remove the role.

3. You work in the IT department of a startup company.

The company predicts rapid growth over the next five years and plans to greatly increase its number of employees.

How will a cloud solution such as Microsoft Office 365 help the company prepare for rapid growth?

- A. by allowing the company to rely on contract employees to compensate for busy periods
- B. by ensuring the company's IT services have 100 percent up time
- C. by allowing the company to add new users more securely than when using traditional IT infrastructure
- D. by allowing the company to increase its IT capacity for a lower cost than traditional IT infrastructure

Answer: D

Explanation: * Some of the benefits of moving to the Microsoft cloud include the following:

/ Having predictable and known costs associated with adoption.

/ Reducing cost in not only immediate monetary value but also in efficiency and resource reallocation benefits.

/ Outsourcing the hassle of installing, managing, patching, and upgrading extremely complex software systems.

Etc.

* For organizations experiencing rapid growth, a top-notch productivity solution can be vital to the success of the business. A cloud-based service that's difficult to manage can divert attention away from a company's core mission. What organizations need is a solution that's simple to use so they can focus on what they do best-growing the business.

4. You are an intern for a company that has all of its hardware and software on-site. Due to a severe storm, the company did not have power for several days, and important data was lost.

How should this problem best have been avoided?

- A. by providing greater storage capacity
- B. by distributing component services across multiple systems
- C. by providing physical and data redundancy

D. by allowing for more scalability

Answer: B

5. You are the help desk technician for a local law firm. The senior partner asks you to add a custom domain for the law firm's Microsoft Office 365 account. The domain will be used for instant messaging and the law firm's public website.

The Microsoft Office 365 admin console prompts you for the purpose of the new domain.

What is the purpose?

- A. Microsoft Exchange Online
- B. Microsoft OneDrive
- C. Microsoft Lync Online
- D. Microsoft SharePoint Online and Microsoft Lync Online

Answer: D

Explanation: You can handle your public website through Microsoft SharePoint Online.

Microsoft Lync Online (becoming Skype for Business) is an easy-to-use cloud-based platform for audio conferencing, online meetings, video conferencing, instant messaging and presentation sharing.
