Microsoft

Exam Questions 98-382

Introduction to Programming Using JavaScript
1. DRAG DROP

You need to write a loop that will traverse the length of an array to find the value orange. If an array element value is null, the code should immediately go to the next element. When the value is found, the loop should exit.

How should you complete the code? To answer, drag appropriate keywords to the correct locations. Each keyword may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

Keywords

<table>
<thead>
<tr>
<th>for</th>
<th>break</th>
<th>continue</th>
<th>while</th>
</tr>
</thead>
<tbody>
<tr>
<td>do</td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

Answer Area

```html
<DOCTYPE html>
<head>
  <title></title>
  <script>
    function doWork() {
      var list = ['apple', 'pear', null, 'orange', 'banana'];
      for (i = 0; i < list.length; i++) {
        if (list[i] == null)
          continue;
        if (list[i] == 'orange') {
          alert('found');
        }
      }
      console.log(list[4]);
    }
  
  function consoleExample() {
    var list = ['apple', 'pear', null, 'orange', 'banana'];
    for (i = 0; i < list.length; i++) {
      if (list[i] == null)
        continue;
      if (list[i] == 'orange') {
        alert('found');
      }
    }
    console.log(list[4]);
  }

  <input type='button' value='test' onclick='doWork()'/>
  <input type='button' value='test' onclick='consoleExample()'/>
</script>
</head>
<body>
  <input type='button' value='test' onclick='doWork()'/>
  <input type='button' value='test' onclick='consoleExample()'/>
</body>
</html>
```

Answer:

<table>
<thead>
<tr>
<th>for</th>
<th>break</th>
<th>continue</th>
<th>while</th>
</tr>
</thead>
<tbody>
<tr>
<td>do</td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

Explanation:

Box 1: for

Box 2: continue

Box 3: break

2. HOTSPOT

You are creating a JavaScript function that returns a date the specified number of months in the future of the current date.
The function must meet the following requirements:

- Accept a number that represents the number of months to add or subtract from the current date.
- Return the current data adjusted by the number of months passed into the function.

How should you complete the code? To answer, select the appropriate code segments in the answer area.

NOTE: Each correct selection is worth one point.

**Answer Area**

```javascript
function adjustMonth(value) {
    var date = new Date();
    var date = Date();
    var date = new Date();
    var date = Date();
    var month = date.getMonth();
    var month = getMonth();
    var month = date.getMonth();
    var month = getMonth();
    date.setMonth(month + value);
    setMonth(month + value);
    return date;
}
```

**Answer:**

```javascript
function adjustMonth(value) {
    var date = new Date();
    var date = Date();
    var date = new Date();
    var date = Date();
    var month = date.getMonth();
    var month = getMonth();
    var month = date.getMonth();
    var month = getMonth();
    date.setMonth(month + value);
    setMonth(month + value);
    return date;
}
```

3. HOTSPOT

You are designing a function that allows you to perform unit tests on other functions in a library. You will invoke each library function by using the eval JavaScript function. If an exception occurs when invoking a function, you want to display a message box with the following message:

The function does not exist.

How should you complete the code? To answer, select the appropriate code segment in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

```javascript
function unitTest(expression) {
    try {
        eval(expression);
    } catch (err) {
        try {
            alert("The function does not exist.");
        } finally {
        }
    }
}
```

Answer: 

Answer Area

```javascript
function unitTest(expression) {
    try {
        eval(expression);
    } catch (err) {
        try {
            alert("The function does not exist.");
        } finally {
        }
    }
}
```

4. DRAG DROP

Evaluate the following code. Line numbers are included for reference only.
What is the value of each variable at line 07? To answer, drag the appropriate value to the correct variable. Each value may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Answer:

5. You are creating a web page that allows customers to choose how hot their spice is. If they choose spicy, a warning should be displayed.

You create the following form. Line numbers are included for reference only.

```html
01 <form name="orderForm" action="#" method="post">
02  <select name="heatIndex" required>
03      <option>Mild</option>
04      <option>Medium</option>
05      <option>Spicy</option>
06  </select>
07  <button onclick="checkWarning()">Order</button>
08 </form>
```
You create the following JavaScript code to display the warning.

```javascript
09 function checkWarning() {
10   var option = document.forms.orderForm["heatIndex"];  
11   if (option == "Spicy") {
12     alert("Spicy food: Good Luck!");
13   }
14 }
```

When you choose spicy and click Order, the warning fails to display. You need to solve this problem.

What should you do?

A. Change line 07 to `<button onclick = "checkWarning();">Order</button>`
B. Change line 07 to `<button onclick = "checkWarning;">Order</button>`
C. Change line 10 to `var option.value = document.forms.orderForm["heatIndex"];`
D. Change line 10 to `var option = document.forms.orderForm["heatIndex"].value;`

Answer: D

Thank You for Trying Our Product

We offer two products:

1st - We have Practice Tests Software with Actual Exam Questions
2nd - Questions and Answers in PDF Format

98-382 Practice Exam Features:

* 98-382 Questions and Answers Updated Frequently
* 98-382 Practice Questions Verified by Expert Senior Certified Staff
* 98-382 Most Realistic Questions that Guarantee you a Pass on Your First Try
* 98-382 Practice Test Questions in Multiple Choice Formats and Updates for 1 Year

100% Actual & Verified — Instant Download, Please Click Order The 98-382 Practice Test Here
