Microsoft

Exam Questions 98-388

Introduction to Programming Using Java
NEW QUESTION 1
HOTSPOT
You are interviewing for a job as a Java developer. You need to demonstrate your understanding of switch statements.
For each of the following code segments, select Yes if the code segment can be changed to a switch statement with up to three case statements. Otherwise, select No.
NOTE: Each correct selection is worth one point.

A. Mastered
B. Not Mastered

Answer: A

Explanation:

NEW QUESTION 2
HOTSPOT
You are writing a Java method.
The method must meet the following requirements:

- Accept a string array named `entries`.
- Iterate through entries.
- Stop the iteration and return `false` if any element has more than 10 characters.
- Otherwise, return `true`.

```java
public boolean validateEntries(String[] entries) {
    boolean allValidEntries = true;
    for (String entry : entries) {
        if (entry.length() > 10) {
            allValidEntries = false;
            break;
        }
    }
    return allValidEntries;
}
```

**Answer:** A

**Explanation:**

NEW QUESTION 3

HOTSPOT

You work for Woodgrove Bank as a Java programmer.

You need to evaluate the following class. Line numbers are included for reference only.
NEW QUESTION 4

HOTSPOT

You have the following code segment. Line numbers are included for reference only.

```java
public class Customer {
    private int id = 3;
    public static void main(String[] args) {
        Customer customer = new Customer();
        id = 5;
        showId();
    }
    protected void showId()
    {
        System.out.println(id);
    }
}
```

The code does not compile.

For each of the following statements, select Yes if the action is required to resolve the compilation error. Otherwise, select No.

NOTE: Each correct selection is worth one point.

A. Mastered
B. Not Mastered

**Answer:** A

**Explanation:**

A. Change the access modifier of the variable id to public.
B. Change the access modifier of the show method to public.
C. On lines 07 and 08, add the prefix 'customer.' to id and show().
NEW QUESTION 5
This question requires that you evaluate the underlined text to determine if it is correct. You have the following class definition:

```java
class Logger {
    public void logError(String message) {
    }
}
```

The `logError` method can be invoked by code in all classes in the same package as the `Logger` class.

Review the underlined text. If it makes the statement correct select "No change is needed." If the statement is incorrect, select the answer choice that makes the statement correct.

A. No change is needed.
B. only by the Logger class.
C. only by the Logger class and classes in the same package that inherit from it.
D. by all classes in all packages.

Answer: D

NEW QUESTION 6
DRAG DROP
You attend an interview for a job as a Java programmer.

You need to declare a two by three array of the double type with initial values.

How should you complete the code? To answer, drag the appropriate code segment to the correct location. Each code segment may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

A. Mastered
B. Not Mastered

Answer: A

Explanation:

NEW QUESTION 7
You need to analyze the following code segment. Line numbers are included for reference only.
01 public void printint()
02 {  
03     if (true) {
04         int num = 1;
05         if (num > 0) {
06             num++;
07         }
08     }
09     int num = 1;
10     addOne(num);
11     num = num - 1;
12     System.out.println(num);
13 }
14
15 public void addOne(int num)
16 {
17     num = num + 1;
18 }

What is the output of line 12 when you run printint()? A. 0
B. 1
C. 2

Answer: A

NEW QUESTION 8
HOTSPOT
You are writing a Java console program. The program must meet the following requirements:
• Read a line of text entered by the user
• Print each word in the text to the console on a separate line
How should you complete the code? To answer, select the appropriate code segments in the answer area.

A. Mastered
B. Not Mastered

Answer: A

Explanation:

NEW QUESTION 9
HOTSPOT
You are writing a Java console program. The program accepts command line arguments. You need to ensure that the main method parses and handles each command line argument. How should you complete the code? To answer, select the appropriate code segments in the answer area.
NEW QUESTION 10

A. Mastered
B. Not Mastered

Answer: A

Explanation:
