Microsoft Exam Questions MB2-707
Microsoft Dynamics CRM Customization and Configuration
1. You customize the default Account form so that it has eight tabs and 120 fields. You use the device-native applications developed by Microsoft to deploy Microsoft Dynamics CRM clients on Android and iPad devices for remote employees.

Some of your remote employees require information from fields under the last tab.

You need to provide these fields to your remote employees.

What are two possible ways to achieve this goal? Each correct answer presents a complete solution. Choose two.

A. Restructure fields on the default Main form by moving the required fields to one of the first five tabs and within the first 75 fields.
B. Edit the existing Mobile form, and place all of the required fields on it. Then assign the remote employees and the existing Mobile form to a specific security role after removing all other Mobile form and security role combinations.
C. Create a new Mobile form and customize it so that all of the required fields appear within the first five tabs and first 75 fields.
D. Assign remote employees to a new security role, and create a new Main form for this security role with the required fields only. Then remove all form and security role combinations that allow remote employees access to other forms.

Answer: A,D

2. You import a managed solution that modifies the account entity. You then import an unmanaged solution that also modifies the account entity.

What is true about this scenario?

A. The modifications from the unmanaged solution will overwrite the modifications from the managed solution.
B. The modifications from both the managed solution and the unmanaged solution will be merged together.
C. The modifications from the unmanaged solution will not appear.
D. The modifications from the managed solution will not appear.

Answer: A
